Import Data from a Text File 1-48

CREATING QUERIES 2-1

Query Basics 2-2

Query Types 2-2

Where Select Queries Fit In 2-2

Query Views 2-3

Anatomy of a Select Query 2-3

Creating Query Criteria 2-5

Creating Simple Criteria 2-5

Matching Patterns in Your Data 2-5

Testing for Nulls and Zero-Length Strings 2-6

Combining Criteria 2-6

Fine-Tuning Your Queries 2-10

Hiding Fields 2-10

Calculated Fields 2-10

Sorting 2-12

Multi-Table Queries and Joins 2-14

Joining Related Tables 2-14

Ad-Hoc Joins and the AutoJoin Option 2-17

LAB 2: CREATING QUERIES 2-23

Lab 2 Overview 2-24

Create a Query with Criteria 2-25

Create a Sorted Query 2-27

Create a Query with a Calculated Field 2-29

Create a Four-Table Query 2-32

GETTING STARTED WITH FORMS 3-1

Why Use Forms? 3-2

Introducing Some Terms 3-2

Getting Started 3-6

A Few New Terms 3-7

Creating a Bound Form 3-8

Dragging Fields onto the Form 3-8

Placing Controls Manually 3-11

Setting Properties of the Controls 3-13

Working with Properties 3-16

Important Form Properties 3-16

Important Control Properties 3-18

Using the Palette Tools....3-19
Manipulating Controls....3-20
Working with Other Control Types....3-26
Using the Option Group Control....3-26
Using the Tab Control....3-28
Creating an Unbound Form....3-30
Getting Started....3-30
Finishing the Unbound Form....3-31
Managing Your Form's Interface....3-33
Default Control Properties....3-33
Templates....3-34
AutoFormat....3-35

LAB 3: GETTING STARTED WITH FORMS....3-41
Lab 3 Overview....3-42
Create a Data Entry Form....3-43
Apply Formatting....3-50

DISPLAYING DATA WITH REPORTS....4-1
Comparing Forms and Reports....4-2
Where Does the Data Come From?....4-2
Access and Banded Reports....4-3
This Chapter's Goal....4-4
Creating a Basic Report....4-7
Introducing the Sorting and Grouping Window....4-8
Sort on EmployeeID....4-8
Grouping on EmployeeID....4-9
Sorting and Grouping Properties....4-10
Setting Up the Group Header....4-12
Performing Calculations on Reports....4-14
Displaying a Calculated Expression....4-14
More Calculated Values....4-17
Adding Page Numbers....4-18
Making Sections Behave....4-21
Handling Page Breaks....4-22
Repeating the Header....4-22
TextBox Properties....4-23
Hiding Duplicate Data....4-23
Creating Running Sums....4-24

Performing More Complex Calculations 4-26
Creating Totals 4-26
Adding a Report Total 4-29
Creating Calculations Based on Totals 4-30
And That's It! 4-31
Print Setup/Output 4-32
Page Setup 4-32
Sending Reports to Other Programs 4-35

LAB 4: DISPLAYING DATA WITH REPORTS 4-43
Lab 4 Overview 4-44
Create a Simple Report 4-45
Add Features to the Report 4-53
Use Calculated Values 4-58

BUILDING A SIMPLE APPLICATION 5-1
Putting Together an Access Application 5-2
Using Hyperlinks in Access Applications 5-3
Adding Hyperlinks to Controls 5-3
What Have You Accomplished? 5-5
Using the Command Button Wizard 5-7
Creating a Switchboard Form Using the Wizard 5-7
What Did the Wizard Do? 5-9
What Is VBA, Anyway? 5-10
What Code Did the Wizard Write? 5-11
Introduction to Event Procedures 5-14
Creating Custom Menus, Shortcut Menus, and Toolbars 5-20
Creating Custom Menus 5-20
Creating a Divider Line 5-23
Attaching a Menu Bar to a Form 5-24
Creating Shortcut Menus 5-25
Creating Custom Toolbars 5-27
Creating a Startup Form 5-31
What Else Can You Do? 5-32
Some Simple Examples 5-34

LAB 5: BUILDING A SIMPLE APPLICATION 5-39
Lab 5 Overview 5-40
Create a Hyperlink Switchboard 5-41
Use a Custom Toolbar with a Form 5-43

INTRODUCTION INTRO-1

Courseware Conventions INTRO-2

The Practice Disks INTRO-3

About the Authors.....INTRO-6

MAKING FORMS AND CONTROLS WORK.....6-1

Build a Data Entry Form 6-2

Reviewing the Data.....6-3

Modifying a Form's Caption.....6-5

When to Modify the Caption?.....6-5

Reacting to an Event 6-7

What Just Happened? 6-9

Validating a Form's Data 6-14

Data Management Events 6-14

Creating the Event Procedure.....6-15

What's the Code Doing?.....6-16

Making Decisions in Code 6-18

Taking Action.....6-20

Using a Control's Data Events.....6-22

The AfterUpdate Event 6-22

How Does It Work?.....6-23

One Small Problem.....6-24

Introducing the Combo (and List) Box 6-26

Making the Form Simpler.....6-26

Pushing and Pulling Data from the ComboBox 6-32

LAB 6: MAKING FORMS AND CONTROLS WORK 6-39

Lab 6 Overview 6-40

Display the Current Order Number 6-41

Hide Unused Controls as Necessary.....6-43

Display the Employee Name 6-46

Display Read-Only Customer Information 6-48

WORKING WITH THE VBA IDE 7-1

A Quick Tour of the VBA IDE 7-2

Getting There—It's Half the Fun 7-2
Touring the VBA IDE 7-2
Summing Up the Major Differences 7-4
Writing Code 7-5
Modules vs. Procedures 7-5
Creating a New Module 7-5
Creating a New Procedure.....7-5
Getting Around the Module Editor Window 7-7
View Definition and View Last Position 7-10
IntelliSense 7-11
Using the Object Browser 7-14
Customizing the VBA Environment 7-16
Testing Code.....7-20
Executing Code Using the Run Command.....7-20
Executing Code Using the Immediate Window 7-20
Setting Breakpoints and Stepping Through Code 7-22

LAB 7: WORKING WITH THE VBA IDE.....7-29
Lab 7 Overview 7-30
Create a VBA Function.....7-31
Navigate Around the VBA IDE.....7-34
Use the Object Browser.....7-37

EFFECTIVE DATABASE DESIGN.....8-1
Why Bother with Design? 8-2
I Don't Have Time for that Relational Mumbo Jumbo 8-2
The Benefits of Good Design.....8-2
What's Involved in Database Design?.....8-3
One Thing the Relational Model Doesn't Provide.....8-3
Relational Model Basics 8-4
Origins of the Model.....8-4
Tables.....8-4
Uniqueness and Keys.....8-5
Choosing a Primary Key 8-5
Foreign Keys 8-6
Relationships 8-7
Normalization 8-11
Normalization and the Normal Forms.....8-11
Before You Begin.....8-11
First Normal Form.....8-11

All rights reserved. Reproduction is strictly prohibited.

Second Normal Form....8-13
Third Normal Form....8-15
Beyond Third Normal Form....8-17
Denormalization....8-18
The Real World Is Messy....8-19

LAB 8: EFFECTIVE DATABASE DESIGN....8-23
Lab 8 Overview....8-24
Normalize a Table Containing Multiple Values within a Single Field....8-25
Normalize a Table into Two Third Normal Form Tables....8-30

MAKING THE MOST OF YOUR TABLES....9-1
Building the Rules of the Business into the Database....9-2
Where Do You Put the Rules?....9-2
The Layered Approach....9-3
Field Validation Rules....9-3
Other Field Properties....9-5
Table Validation Rules....9-8
Other Places That You Can Put the Rules of Your Business....9-9
Relationships and Referential Integrity....9-10
Viewing Relationships....9-10
Review: Creating Relationships....9-10
Using the Cascade Options....9-12
Relationships and Linked Tables....9-14
Deleting Relationships....9-15
Creating Indexes....9-16
Why Create Indexes?....9-16
Creating an Index Using the Indexed Property....9-17
Creating an Index Using the Indexes Window....9-18

LAB 9: MAKING THE MOST OF YOUR TABLES....9-25
Lab 9 Overview....9-26
Validate Field Values....9-27
Create and Manage Relationships....9-32

PARAMETER AND AGGREGATE QUERIES....10-1
Creating Parameter Queries....10-2
Creating a Simple Parameter Query....10-2
Creating a Form-Based Parameter Query....10-4

Copyright © by Application Developers Training Company and AppDev Products Company, LLC
All rights reserved. Reproduction is strictly prohibited.

Using Parameter Queries in Applications....10-6
Aggregate Queries....10-8
What are Aggregate Queries?....10-8
Totals Queries....10-8
Crosstab Queries....10-13
Query Properties....10-20
Query Properties....10-20
Field List Properties....10-24
Field Properties....10-24

LAB 10: PARAMETER AND AGGREGATE QUERIES....10-29
Lab 10 Overview....10-30
Create a Parameter Query....10-31
Create a Crosstab Query....10-33
Create a Top Values Query....10-35

CREATING DATA ACCESS PAGES....11-1
Introducing Data Access Pages....11-2
What Is a Data Access Page?....11-2
Creating Data Access Pages....11-2
Creating a Simple Data Access Page Using Design View....11-3
Previewing a Page in Internet Explorer....11-6
Applying Themes and Backgrounds....11-7
Working with Data Access Pages....11-11
Working with Controls....11-11
Aligning and Sizing Controls....11-16
Working with the Grid....11-17
Creating a Data Access Page with Groups....11-18
Creating a Page with Groups: An Example....11-18
The Sorting and Grouping Window....11-25
Deploying Data Access Pages....11-27
Understanding When a Page Is Read- Only....11-27
Fixing Links....11-27
Deploying Your Pages to a Web Server....11-29
Deciding When to Use Data Access Pages....11-31

LAB 11: CREATING DATA ACCESS PAGES....11-37
Lab 11 Overview....11-38
Creating a Basic Data Access Page....11-39
Add a Drop-Down List Control to a Page....11-43

Create a Data Access Page with Multiple Groups 11-46

INVESTIGATING VBA 12-1

Why Use VBA? 12-2

Introducing Modules and Procedures 12-3

The Declarations Area 12-4

Different Kinds of Modules 12-4

Different Types of Procedures 12-5

Calling Procedures 12-6

Introducing the Immediate Window 12-6

What's a Function? 12-7

Creating Your Own Procedures 12-10

Getting Started 12-10

Returning a Value 12-11

Performing the Calculation 12-12

Using Variables 12-17

Implicit vs. Explicit Declarations 12-17

Declaring Variables 12-20

Variable Data Types 12-22

The Default Data Type 12-22

Working with Numbers 12-23

Working with True/False Values 12-25

Working with Dates 12-25

Working with Strings 12-27

Initializing Variables 12-27

Finishing the Age Function 12-29

Creating a Variable 12-29

Performing the Calculation 12-29

Using Constants 12-32

Using MsgBox 12-32

Creating Your Own Constants 12-34

LAB 12: INVESTIGATING VBA 12-39

Lab 12 Overview 12-40

Work with the Immediate Window 12-41

Create the CheckNumber Procedure 12-43

Call the Procedure from the BeforeUpdate Event Procedure 12-47

PROGRAMMING OBJECTS 13-1

Copyright © by Application Developers Training Company and AppDev Products Company, LLC
All rights reserved. Reproduction is strictly prohibited.

Working with Objects....13-2
Opening a Form....13-2
Using the OpenForm Method....13-3
Sending Optional Information....13-3
Working with Collections....13-5
Referring to an Open Form....13-5
Referring to Items in Collections....13-5
Referring to Controls on Forms....13-7
Referring to the Current Form....13-8
Iterating Through Collections....13-9
Using For...Next Loops....13-10
Using Object Variables....13-12
Aiming an Object Variable....13-12
Determining the Control Type....13-15
But the Example Still Doesn't Work!....13-15
Using With...End With....13-16
Referring to Objects in Collections, Revisited....13-18

LAB 13: PROGRAMMING OBJECTS....13-23
Lab 13 Overview....13-24
Work with Access Objects....13-25
Change Multiple Text Box Properties....13-29
Disable All of the Buttons on a Form....13-31

REPORT TIPS AND TRICKS....14-1
Getting Just the Data You Want....14-2
Creating a Report Showing Only the Current Record from a Form....14-2
How Does It Work?....14-3
Creating a Report Based on a Form's Filtered Rows....14-4
How Does It Work?....14-5
Canceling a Report with the NoData Event....14-6
Creating Reports with Multiple Columns....14-8
How Does It Work?....14-10
Using the GrpKeepTogether Report Property....14-12
Numbering Items on a Report....14-13
Using RunningSum in a Novel Way....14-13
How Does It Work?....14-14
Using BackColor to Create Alternate Gray Lines....14-15
Alternating Bands....14-15

Copyright © by Application Developers Training Company and AppDev Products Company, LLC

How Does It Work? 14-17

LAB 14: REPORT TIPS AND TRICKS 14-21

Lab 14 Overview 14-22

Print a Report Showing Only One Record 14-23

Print a Report Showing a Filtered Set of Records 14-25

Cancel a Report with No Data 14-26

Provide Numbered Details 14-28

CONTROLLING CONTROLS 15-1

Using Subforms 15-2

One-to-Many Relationships 15-2

Creating a Subform 15-2

Subform Properties 15-5

Editing a Subform 15-6

Referring to Controls on Subforms 15-7

Using MultiSelect ListBox Controls 15-11

The MultiSelect Property 15-11

Other Important Properties 15-11

Showing Selected Names 15-13

Clearing the Selections 15-15

Handling New Entries in a ComboBox 15-17

Allowing New Entries 15-17

Using the Popup Form 15-21

Working with Tab Controls 15-23

Creating a Form with a Tab Control 15-23

Changing Page Captions 15-23

Laying Out the Controls 15-23

Adding Additional Pages 15-24

Changing the Page Order 15-25

Importance of Tab Order 15-26

Using the Cycle Property 15-27

Programming the Tab Control 15-27

Working with Key Events 15-28

Important Properties 15-29

LAB 15: CONTROLLING CONTROLS 15-35

Lab 15 Overview 15-36

Use a Subform to Display Detail Rows 15-37

Use a Multiselect ListBox to Filter Rows for a Report 15-41

All rights reserved. Reproduction is strictly prohibited.

PROGRAMMING FORMS' DATA 16-1
Filtering and Sorting Forms 16-2
Setting a Form's Sort Order (The OrderBy Property) 16-2
Enabling the Sort (The OrderByOn Property) 16-2
Using the OrderBy and OrderByOn Properties 16-3
Filter and FilterOn Properties 16-4
Finding a Row on a Form 16-7
Forms and Their Data 16-7
Introducing the Recordset Object 16-8
Dueling Objects 16-9
Using DAO in Access 2000 16-9
What's Really Going On? 16-11
In Summary 16-12
Back to Our Story 16-13
Finding a Row 16-16
What's a Bookmark? 16-16
Display the Selected Row 16-17
Mark a Row and Return to It Later 16-19
What Happens When You Click the Toggle Button? 16-19
What Happens When You Release the Toggle Button? 16-20
Bookmarks and the New Row 16-21
Using a Form's Recordset Property (Access 2000) 16-23
Using the Recordset Property 16-24

LAB 16: PROGRAMMING FORMS' DATA 16-29
Lab 16 Overview 16-30
Add a Sort Feature 16-31
Add a Filter Feature 16-33
Add a Search Feature 16-35
Add a Rewind Feature 16-38

FORM TIPS AND TRICKS 17-1
Creating a Splash Screen 17-2
Working Through the Details 17-2
Creating the Splash-Screen Form 17-2
Controlling the Timing 17-3
Setting Startup Options 17-4
Using Popup Forms 17-6
Creating Popup Forms 17-7
Controlling a Form's Closing 17-11

Copyright © by Application Developers Training Company and AppDev Products Company, LLC
All rights reserved. Reproduction is strictly prohibited.

How to Control a Form's Closing? 17-11
Tapping into Keyboard Events....17-13
Modifying Keystrokes....17-13
KeyPress vs. KeyDown/KeyUp 17-14
Using ActiveX Controls....17-16
What Is an ActiveX Control? 17-16
Adding an ActiveX Control to a Form 17-16
Modifying an ActiveX Control's Properties 17-17
Binding an ActiveX Control 17-20
Deploying ActiveX Controls 17-21
Getting to Know an ActiveX Control....17-21
Controlling ActiveX Controls Using VBA 17-22
A More Advanced Approach 17-24

LAB 17: FORM TIPS AND TRICKS 17-31
Lab 17 Overview 17-32
Create a Splash Screen 17-33
Control a Form's Closing....17-36
Create a Popup Calendar Form....17-38

APPENDIX A: THE REDDICK VBA NAMING CONVENTIONS, VERSION 6.0....A-1
Changes to the Conventions....A-2
An Introduction to Hungarian....A-3
Tags A-4
Creating Data Types....A-6
Constructing Procedures A-9
Prefixes A-10
Suffixes....A-12
File Names A-12
Host Application and Component Extensions to the Conventions....A-13

APPENDIX B: USEFUL VBA FUNCTIONS....B-1
Lots of Functions to Choose From....B-2
Strings B-2
Dates and Times....B-3
Conversion B-3
Other B-4
New in VBA 6.0....B-4

Splitting Access Databases 22-5
Locking.....22-7
Record vs. Page Locking 22-7
Access Locking Options.....22-8
Creating a Custom Write Conflict Dialog Box.....22-12
Access 2000: Locking in ADO Code 22-16
Access 97/2000: Locking in DAO Code 22-17
Keeping Recordsets Current 22-19
Refreshing Records 22-19
Datasheets 22-19
Forms 22-20
Performance Considerations.....22-22
Transaction Processing.....22-23
What Are Transactions? 22-23
ADO Support for Transactions 22-23
DAO Support for Transactions 22-23

LAB 22: DESIGNING MULTIUSER APPLICATIONS 22-31
Lab 22 Overview 22-32
Split a Database.....22-33
Compare Optimistic and Pessimistic Locking 22-35
Create a Custom Write Conflict Dialog Box 22-39

EXPLORING REPLICATION 23-1
Replication Basics.....23-2
Why Would You Want to Use Replication? 23-2
How Replication Works.....23-3
Replicating a Database 23-5
Converting a Database 23-5
Creating Additional Replicas.....23-7
Creating Prevent Deletes Replicas 23-7
Changes Access Makes to a Database When You Replicate It.....23-8
Changes Made to a Database 23-8
Synchronizing Replicas 23-10
Replication Manager.....23-10
Conflict Management 23-12
Managing Access 97 Conflicts.....23-12
Managing Access 2000 Conflicts 23-13
Partial Replication 23-18

The Partial Replica Wizard 23-18
Managing and Synchronizing Partial Replicas 23-23

LAB 23: EXPLORING REPLICATION....23-27
Lab 23 Overview 23-28
Replicate a Database 23-29
Synchronize Replicas....23-33
Create a Partial Replica....23-35

AUTOMATING OFFICE APPLICATIONS 24-1
What Is Automation? 24-2
Working with Other Applications....24-3
The Role of Type Libraries....24-3
Setting References 24-3
Viewing Other Applications' Objects 24-5
Creating an Instance of the Application....24-6
How Automation Works, In a Nutshell....24-7
A Simple Automation Example....24-7
Are All Applications the Same?....24-10
Example: Building an Excel Chart 24-11
A Word About Excel....24-11
Create a New Workbook....24-12
Remove Extra Sheets....24-13
Open a Recordset....24-14
Transfer Data....24-15
Format the Data....24-15
Create the Chart 24-16
Clean Up....24-17
Run the Procedure....24-18
Complete Procedure Listing....24-18
MailMerge with Word....24-22
Overview of the Object Model 24-22
Access as an Automation Server....24-27
Using Access as an Automation Server 24-27
Calling Access Reports from Excel 24-27

LAB 24: AUTOMATING OFFICE APPLICATIONS....24-35
Lab 24 Overview 24-36
Send Data to Microsoft Excel 24-37
Send Data to Microsoft Word 24-42

SECURING YOUR APPLICATIONS 25-1
Choosing the Right Security System 25-2
Which Security Model Is Right for You? 25-2
Database Passwords 25-2
User-Level Security 25-5
Access 2000 Changes to Security 25-6
Workgroups 25-7
The Default Workgroup File 25-7
Creating a Secure Workgroup 25-7
Joining a Workgroup 25-9
Activating Security 25-10
Users and Groups 25-13
User Accounts 25-13
Group Accounts 25-13
Managing Group Accounts 25-13
Managing User Accounts 25-15
Accounts, PIDs, and SIDs 25-18
Built-In Accounts 25-18
Permissions 25-21
Objects and Permissions 25-21
Managing Permissions 25-21
What Permissions Mean 25-22
Explicit and Implicit Permissions 25-25
Ownership 25-27
Using the Security Wizard to Properly Secure Your Database 25-31
Access 97 Security Wizard 25-31
Access 2000 Security Wizard 25-33
Moving a Secured Database 25-34

LAB 25: SECURING YOUR APPLICATIONS 25-39
Lab 25 Overview 25-40
Secure a Database Using the Access 2000 Security Wizard 25-41
Create User and Group Accounts 25-51
Manage Object Permissions 25-56

BUILDING ACCESS DATA PROJECTS 26-1
Introduction to Access Projects 26-2
What's Different? 26-2
SQL Server/MSDE Versions 26-2
Creating a New Project 26-5

Copyright © by Application Developers Training Company and AppDev Products Company, LLC

Creating a New Project to Connect to an Existing Database....26-5
Creating a New Project and Database from Scratch....26-8
Upsizing an MDB Database to an Access Project....26-9
Creating SQL Server Objects....26-14
Creating SQL Server Tables....26-15
Creating a New Table....26-15
Modifying a Table....26-18
Creating SQL Server Database Diagrams....26-19
Creating SQL Server Views....26-23
Creating SQL Server Stored Procedures....26-27
Stored Procedure Syntax....26-27
The Power of Stored Procedures....26-28
Creating Stored Procedures....26-29
Using Stored Procedures in Access Applications....26-35
What About Triggers?....26-35

DEVELOPING ACCESS 2000 CLIENT/SERVER APPLICATIONS....27-1
Introduction to Client/Server....27-2
What Is Client/Server?....27-2
What Are Client/Server Benefits?....27-3
When Should You Consider Client/Server?....27-4
ODBC, OLE DB, and ADO....27-5
MDB vs. ADP....27-7
What Does an ADP Offer?....27-7
What Does an MDB Offer?....27-7
Choosing the Project Type....27-8
Designing Client/Server Applications....27-9
Goals of Client/Server Application Design....27-9
Designing MDB Client/Server Applications....27-10
Linking ODBC Tables....27-10
Using Pass-Though Queries....27-12
Using ADO to Access Server Data....27-14
Contrasting MDB Data Access Methods....27-15
Database Optimization Examples....27-16
Designing ADP Client/Server Applications....27-23
Using ADP Forms and Reports....27-23
Using ADO....27-28

LAB 27: DEVELOPING ACCESS 2000 CLIENT/SERVER APPLICATIONS (INCLUDES LAB 26)....27-35

Lab 27 Overview 27-36
Create a New Access Data Project and Database 27-37
Create a SQL Server/MSDE Table 27-41
Create a SQL Server/MSDE Stored Procedure 27-44
Using ServerFilterByForm 27-46

DEPLOYING ACCESS APPLICATIONS 28-1
The Finishing Touches 28-2
Managing VBA Code 28-3
Introducing the Access Runtime Version 28-5
Developing Runtime Applications 28-7
No Database Window 28-7
No VBE Window 28-7
Same EXE File 28-7
Error Handling Is Critical 28-7
No Wizards 28-7
No Design Surfaces 28-8
Some Menus Are Not Available 28-8
No Standard Toolbars 28-8
Application Design Considerations 28-8
Deploying Access Applications 28-11
Installing the Add-In 28-11
Using the Add-In 28-12
Managing Scripts 28-27

LAB 28: DEPLOYING ACCESS APPLICATIONS 28-31
Lab 28 Overview 28-32
Create an MDE File 28-33
Package and Deploy an Application 28-34

APPENDIX A: THE REDDICK VBA NAMING CONVENTIONS, VERSION 6.0 ..... A-1
Changes to the Conventions A-2
An Introduction to Hungarian A-3
Tags A-4
Creating Data Types A-6
Constructing Procedures A-9
Prefixes A-10
Suffixes A-12
File Names A-12

Copyright © by Application Developers Training Company and AppDev Products Company, LLC
All rights reserved. Reproduction is strictly prohibited.

Host Application and Component Extensions to the Conventions A-13

APPENDIX B: USEFUL VBA FUNCTIONS B-1

Lots of Functions to Choose From B-2
Strings B-2
Dates and Times B-3
Conversion B-3
Other B-4
New in VBA 6.0 ..... B-4

APPENDIX C: USING TOOLS FROM THE OFFICE DEVELOPER EDITION (OFFICE 97) C-1

Using the ODE C-2
What Is the ODE? C-2
Why Use It? C-2
Developing Runtime Applications C-4
General Considerations C-4
Application Design Considerations C-5
Using the Setup Wizard C-8
Using the Setup Wizard C-8
Getting Organized C-8
Running the Setup Wizard C-9
Running Your Custom Setup Program C-15

APPENDIX D: DATA ACCESS OBJECTS D-1

What Is DAO, Anyway? D-2
Two Object Hierarchies D-2
Details of Syntax D-4
DBEngine and Workspaces D-5
Referring to Objects D-6
Collections of Objects D-7
Bang (!) versus Dot (.) D-8
Using Default Collections D-8
Enumerating Collections D-10
Working with Recordsets D-12
Types of Recordsets D-12
Creating Recordsets D-13
Finding Records in Recordsets D-16
Updating Records in Recordsets D-21
Deleting Records in Recordsets D-22

Copyright © by Application Developers Training Company and AppDev Products Company, LLC
All rights reserved. Reproduction is strictly prohibited.

Inserting Rows in Recordsets D-23
Creating and Using QueryDefs D-25
QueryDefs D-25
Creating and Running a Select Query D-25
Creating a Recordset from a Parameter Query D-27
Executing Action Queries D-29
SQL Review D-32
Using Variables in Your Criteria D-34

APPENDIX E: DEVELOPING ACCESS 97 CLIENT/SERVER APPLICATIONS E-1
Introduction to Client/Server E-3
What Is Client/Server? E-3
What Are Client/Server Benefits? E-4
When Should You Consider Client/Server? E-5
Open Database Connectivity (ODBC) E-7
What Is ODBC? E-7
Setting Up a Data Source E-8
Using Server Data with Access E-13
Linking ODBC Tables E-13
Using Pass-Though Queries E-15
Using ODBCDirect E-18
Contrasting Server Data Access Methods E-22
Designing Client/Server Applications E-23
Goals of Client/Server Application Design E-23
Optimizing Client/Server Applications E-23

INDEX INDEX-1
