

SQL Server 2000: DTS and Transformations

Table of Contents

INTRODUCTION	INTRO-1
Courseware Conventions	INTRO-2
The Practice Disks	INTRO-3
Chapter Files	INTRO-3
Attaching the SQL Server Whistler Database	INTRO-3
About the Author	INTRO-6
INTRODUCTION TO DATA WAREHOUSES AND CUBES	1-1
Database Technology	1-2
Transactional Databases	1-2
Analysis Databases	1-4
Data Warehouses.....	1-6
Developing the Schema.....	1-7
Star Schemas	1-8
Snowflake Schema	1-10
Data Marts.....	1-11
OLAP Cubes	1-13
Definition.....	1-13
Storage Options.....	1-13
Partitions.....	1-14
Virtual Cube.....	1-14
Data Transformation Services	1-16
DTS in the Data Mart	1-16
DTS in OLAP	1-17
DTS and Data Analysis.....	1-17
DTS IMPORT/EXPORT WIZARD	2-1
What Is the Import/Export Wizard?.....	2-2
Wizard Functionality	2-2
Wizard Applications	2-3
Data Transfer Plan.....	2-3
Copying	2-5
Planning the Copy	2-5
Transferring SQL Server Objects	2-15
Selecting Objects.....	2-17
Object Copy Options.....	2-17

Prototype Package	2-19
Employee Dimension	2-19
Planning the Dimension Load	2-20
LAB 2: DTS IMPORT/EXPORT WIZARD.....	2-32
Lab 2 Overview	2-33
Copy a Table.....	2-34
Transfer Database Objects.....	2-37
Create a Prototype Package	2-40
DTS PACKAGES	3-1
DTS Package	3-2
DTS Package Designer	3-3
Menus.....	3-3
Toolbars	3-4
Design Sheet.....	3-5
Connections	3-6
Sources	3-6
Configuring	3-7
Deploying.....	3-8
Employee_dim Package	3-9
Maintenance	3-15
Tasks	3-20
Transform Data.....	3-20
Manage Data	3-21
Job Function	3-22
Creating Tasks.....	3-23
Steps.....	3-31
Precedence	3-31
Step Properties	3-32
Creating the Workflow.....	3-33
Package Cleanup	3-35
LAB 3: DTS PACKAGES	3-39
Lab 3 Overview	3-40
Modify and Set Up Connections	3-41
Add DTS Tasks	3-47
Define Steps.....	3-52
DTS COMMON TASKS	4-1

Bulk Insert Task	4-2
Bulk Insert Task Options.....	4-3
Format Files.....	4-6
Applying the Bulk Insert Task.....	4-8
Staging Tables.....	4-9
Bulk Insert Package	4-9
Execute SQL Task	4-17
Parameterized Queries	4-17
Dynamic Queries	4-19
Query Results	4-19
Table_delete	4-21
Transform Data Task.....	4-25
The DTS Data Pump	4-25
Creating Transformations	4-27
Building Transformations	4-31
Error Handling	4-40
SQL Server Optimization	4-43
Configuring Options	4-45
LAB 4: DTS COMMON TASKS.....	4-53
Lab 4 Overview	4-54
Load Staging Tables	4-55
Create Time Dimension.....	4-63
Load Warehouse Dimension	4-67
EXTENDING TRANSFORMATIONS	5-1
Transformation Scripts	5-2
Script Components	5-3
Constants	5-5
Script Management.....	5-6
ActiveX Script	5-8
Advanced Transformations.....	5-13
One Row Into Many	5-14
Lookup Queries.....	5-21
Best Practices.....	5-21
Lookup Query Implementation	5-22
Multiphase Data Pump	5-30
Phases	5-30
Applications	5-33

Data Driven Query Task	5-35
Practical Example	5-36
LAB 5: EXTENDING TRANSFORMATIONS.....	5-47
Lab 5 Overview	5-48
Load Company Dimension	5-49
Load Market Stage	5-55
Multiphase Data Pump	5-61
PACKAGE ADMINISTRATION	6-1
Overview of Administration	6-2
Package Versions.....	6-2
Storing DTS Packages	6-4
SQL Server.....	6-4
Meta Data Services	6-4
Structured Storage File	6-5
Visual Basic File	6-6
Securing Packages.....	6-7
Using Metadata	6-9
Meta Data Services	6-9
Data Lineage	6-11
Executing Packages.....	6-17
Package Execution Utilities.....	6-18
Execution Logs	6-24
Modular Packages	6-26
Managing Properties	6-31
Disconnected Edit.....	6-31
Dynamic Properties Task.....	6-35
Connection Properties	6-38
LAB 6: PACKAGE ADMINISTRATION.....	6-43
Lab 6 Overview	6-44
Using Data Lineage.....	6-45
Using the Dynamic Properties Task.....	6-51
INDEX.....	INDEX-1
