

Microsoft SQL Server 2005: Administrator

Table of Contents

INTRODUCTION	INTRO-1
Prerequisites	INTRO-2
Installing the Practice Files	INTRO-3
Software Requirements	INTRO-3
Hardware Requirements	INTRO-3
Sample Database	INTRO-3
Installation	INTRO-5
About the Authors	INTRO-6
UNDERSTANDING AND IMPLEMENTING SECURITY	1-1
Security Overview	1-2
The Threats	1-2
SQL Server 2005 Security Design Philosophy	1-3
The Two Stages of Security	1-5
Authentication	1-7
Configuring SQL Server Security Settings	1-8
Windows Integrated Authentication	1-10
SQL Server Authentication	1-17
Authorization	1-25
Principals	1-25
Securable Objects	1-37
Permissions	1-40
Permission Types	1-40
Permission Statements	1-42
Granting Permissions	1-42
Roles, Permissions, and Schemas	1-47
Execution Context	1-51
Metadata Security	1-55
Data Encryption	1-58
Encryption Keys	1-59
Encrypting Data	1-61
Security Epilog	1-66
LAB 1: UNDERSTANDING AND IMPLEMENTING SECURITY	1-71
Lab 1 Overview	1-72
Create a SQL Server Login	1-73

Grant Permissions to Database Objects and Statements	1-76
Encrypt a Data Field	1-78
ANALYZING AND TUNING PERFORMANCE	2-1
Evaluating Performance	2-3
Define Monitoring Goals	2-3
SQL Server Monitoring Tools.....	2-3
Monitoring with SQL Server Profiler	2-6
Profiler Terminology.....	2-6
Getting Started with the Profiler	2-7
Tuning Queries	2-15
How Join Types Affect Performance.....	2-15
Join Hints	2-15
Performance Issues with Joins and Subqueries	2-16
Avoid Cursors	2-23
Indexes and Partitions	2-25
What Is an Index?	2-25
What Is a Partition?.....	2-28
Using the Database Engine Tuning Advisor	2-30
Capturing a Workload	2-31
Analyzing the Workload	2-31
Providing an Indexing and Partition Recommendation	2-31
Understanding SQL Server Performance Problems.....	2-35
Slow Queries.....	2-35
CPU Bottlenecks.....	2-37
Memory Bottlenecks	2-41
Troubleshooting with Dynamic Management Views	2-43
LAB 2: ANALYZING AND TUNING PERFORMANCE	2-49
Lab 2 Overview.....	2-50
Trace Deadlock with SQL Server Profiler	2-51
AUTOMATING ADMINISTRATIVE TASKS.....	3-1
Introduction	3-2
SQL Server Agent.....	3-3
Starting Agent	3-3
Setting Agent Properties	3-5
Operators	3-7
Jobs	3-8
Alerts.....	3-12

Maintenance Plans	3-15
Maintenance Plan Wizard	3-15
Maintenance Plan Designer	3-21
SQL Management Objects (SMO)	3-24
SMO Object Model	3-24
Accessing and Managing a Server	3-26
LAB 3: AUTOMATING ADMINISTRATIVE TASKS	3-49
Lab 3 Overview	3-50
Create an Operator	3-51
Create a Job	3-53
Create an Alert	3-58
PROGRAMMING REPLICATION	4-1
Overview of SQL Server Replication	4-2
Publishing Model	4-2
Replication Types	4-3
Agents and Metadata	4-5
Replication Programming Interfaces	4-7
Replication Stored Procedures	4-8
Replication Management Objects	4-9
Agent Executables and ActiveX Controls	4-13
Configuring Replication	4-14
Publishing Data	4-14
Generating Replication Scripts	4-19
Running the Sample Application	4-22
Creating Subscriptions	4-23
Synchronizing Data	4-28
Starting a Synchronization	4-28
Showing Synchronization Status	4-31
Subscription Status	4-32
Reinitializing a Subscription	4-35
LAB 4: PROGRAMMING REPLICATION	4-43
Lab 4 Overview	4-44
Creating a Publication	4-45
Creating and Synchronizing a Subscription Using RMO	4-48
DISASTER RECOVERY	5-1
Planning a Backup Strategy	5-2

Your Business Needs and Capabilities.....	5-2
Considering Data Recovery Needs.....	5-3
Availability Demands.....	5-3
Data Usage	5-4
Size of Database(s)	5-4
Database Server Configuration.....	5-4
Disaster Recovery Testing.....	5-5
Recovery Time Considerations.....	5-5
Backing Up Databases	5-6
Backup Devices	5-6
Creating Backups.....	5-11
Recovery Models	5-13
Types of Backup	5-17
Scheduling Your Backups.....	5-29
Scheduling System Database Backups	5-29
Scheduling Simple Backups	5-29
Scheduling Full and Bulk-Logged Backups	5-30
Backing Up Related Databases	5-31
Verifying Backup Media	5-33
Using Checksums	5-33
Using RESTORE VERIFYONLY.....	5-35
Restoring Databases	5-36
Roll Forward Set	5-36
Restoring with the Simple Recovery Model	5-37
Restoring with Full/Bulk-Logged Recovery Models	5-38
Online Restore	5-47
Using Database Snapshots	5-49
Creating a Database Snapshot.....	5-49
Reverting to a Database Snapshot.....	5-51
Deleting a Database Snapshot	5-51
Summary	5-52
LAB 5: DISASTER RECOVERY.....	5-55
Lab 5 Overview.....	5-56
Back Up and Restore a Simple Recovery Model.....	5-57
Back Up and Restore a Full Recovery Model.....	5-66
Create and Revert to a Database Snapshot.....	5-76
FAILOVER CLUSTERING.....	6-1
High Availability Overview	6-2

Levels of Availability and Downtime.....	6-2
Estimating Availability Requirements.....	6-3
SQL Server 2005 Failover Cluster.....	6-4
Preparing a Server Cluster	6-6
Hardware and Software Requirements.....	6-8
Special Considerations	6-10
Creating a New Cluster.....	6-11
Set Up Domain Service Accounts.....	6-11
Prepare Static IP Addresses.....	6-12
Configure Computer Servers	6-12
Prepare Shared Disks.....	6-14
Create the New Cluster Server	6-16
Configure the Cluster	6-21
Add the Distributed Transaction Coordinator	6-22
Installing SQL Server 2005 Failover	6-25
What to Expect.....	6-25
Before Installing SQL Server Cluster	6-26
Running SQL Server Setup	6-26
System Configuration Checks.....	6-27
After Installing SQL Server	6-35
Adding SQL Server Nodes	6-38
Add a New Node to the Cluster	6-38
Add a Node to the SQL Server Virtual Server Cluster	6-41
Remove a SQL Server Virtual Server Node	6-47
DATABASE MIRRORING	7-1
Understanding Mirroring	7-2
How Mirroring Works	7-2
The Mirroring Session.....	7-4
Database Mirroring Operating Modes.....	7-5
Role Switching (Failover)	7-7
Other Mirroring Details.....	7-8
Database Mirroring Endpoints	7-9
Client-Side Redirection	7-10
Setting Up Database Mirroring	7-11
Prerequisites	7-11
Configuration Recommendations.....	7-12
Configuring the Recovery Model.....	7-12
Configuring Mirroring with SQL Server Management Studio and Transact-SQL	7-13

Configuring the Endpoints.....	7-14
Configuring the Operating Mode.....	7-21
Setting Up the Mirror Server Database.....	7-23
Backing Up the Principal.....	7-23
Restoring Full Backup on the Mirror	7-24
Restoring Transaction Log Backups on the Mirror.....	7-25
Starting the Mirroring Session.....	7-26
Working with a Mirror Session	7-27
Accessing Mirror Data with Snapshots	7-32
Monitoring Database Mirroring	7-33
Viewing the Mirror, Witness, and Endpoints	7-33
LAB 7: DATABASE MIRRORING.....	7-39
Lab 7 Overview.....	7-40
Configure Security for Database Mirroring	7-41
Configure Database Mirroring.....	7-51
Monitor Database Mirroring	7-60
LOG SHIPPING.....	8-1
Overview.....	8-2
Log Shipping Requirements.....	8-3
Security Requirements.....	8-4
Configuring Log Shipping	8-5
Transaction Log Shipping Property Page	8-5
Configuring the Primary Database.....	8-6
Configuring the Secondary Database	8-9
Configuring the Monitor Server	8-14
Saving the Log Shipping Configuration.....	8-17
Removing Log Shipping.....	8-18
Monitoring Log Shipping Jobs	8-20
Viewing the Agent Job History	8-20
Transaction Log Shipping Status Report	8-21
Querying Log Shipping System Tables.....	8-22
Querying with Log Shipping Stored Procedures	8-23
Configuring Log Shipping in Transact-SQL	8-24
Configuring the Primary Database.....	8-24
Configuring the Primary Backup Job	8-25
Configuring the Secondary Database	8-27
Configuring the Secondary Copy Job	8-28
Configuring the Secondary Restore Job.....	8-29

Removing Log Shipping	8-31
LAB 8: LOG SHIPPING	8-35
Lab 8 Overview	8-36
Configure Security for Log Shipping	8-37
Configure Log Shipping	8-45
Monitor Log Shipping	8-52
PEER-TO-PEER REPLICATION	9-1
High-Availability	9-2
Requirements and Limitations	9-4
Protecting Data with Partitioning	9-4
Special Identity Columns Handling	9-5
Configuring Peer-to-Peer Replication	9-6
Security Planning	9-7
Configuring the Distributor	9-11
Configure Distribution Wizard	9-11
Adding a Publisher Server	9-17
Changing a Distributor's Properties	9-18
Securing the Distributor	9-19
Creating the Publisher	9-20
Specify the Distributor	9-20
Publication Database	9-21
Publication Type	9-22
Articles	9-22
Filter Table Rows and Snapshot Agent	9-23
Agent Security	9-23
Wizard Actions	9-25
Complete the Wizard	9-26
Creating Publication	9-27
Allowing Peer-to-Peer Subscriptions	9-27
Securing the Publisher	9-28
The Replication Monitor	9-29
Configuring Peer-to-Peer Subscribers	9-34
Initializing the Subscriber Database	9-34
Peer Distributor Preparation	9-36
Securing the Distributor	9-38
Configuring Peer-to-Peer Topology	9-40
Publication Specification	9-41
Peers	9-41

Log Reader Agent Security	9-42
Distribution Agent Security	9-45
New Peer Initialization	9-46
Completing the Wizard	9-48
Securing the Publisher	9-49
Configuring the PAL	9-49
Identity Columns	9-50
Adding a Node to an Existing Topology	9-50
Well-Connected Topology	9-51
LAB 9: PEER-TO-PEER REPLICATION	9-57
Lab 9 Overview	9-58
Configure the Distributor	9-59
Create the Publisher	9-64
Configure the Peer-to-Peer Topology	9-72
MONITORING AND TROUBLESHOOTING	10-1
Diagnosing and Resolving Database Server Errors	10-2
Using the Dedicated Administrator Connection (DAC)	10-2
SQL Server Error Logs	10-13
Error Messages in Event Logs	10-15
Setting Up Alerts in SQL Server Agent	10-17
Advantages of Using Alerts	10-17
Configuring the Alert	10-17
Monitoring SQL Server Agent Job History	10-22
Job Activity Monitor	10-23
Gathering Performance and Optimization Data Using DMVs	10-25
DMV Permission Requirements	10-26
Inspecting a Server with DMVs	10-33
Troubleshooting Bottlenecks	10-33
Collecting Information Using DMVs	10-37
SQL Server 2005 Performance Dashboard Reports	10-38
DMVStats	10-42
LAB 10: MONITORING AND TROUBLESHOOTING	10-49
Lab 10 Overview	10-50
Use the DAC to Access an Unresponsive Server	10-51
Experiment with DMVs	10-59
Create an Alert	10-62

IMPLEMENTING SERVICE BROKERS.....	11-1
Understanding Service Brokers	11-2
Service Broker Advantages	11-2
Service Broker Applications	11-3
Service Broker Messaging	11-4
Service Broker Uses	11-5
Designing Service Broker Applications.....	11-6
Message Types.....	11-6
Service Broker Activation	11-7
Transaction Life Cycle	11-9
Handling Errors	11-11
Handling Poison Messages	11-12
Service Broker Security	11-12
Programming Service Broker Applications	11-18
Enabling Service Broker	11-18
Creating Message Types	11-19
Creating Contracts	11-20
Creating the Queue.....	11-21
Creating the Service	11-22
Creating Routes	11-23
Creating Service Broker Endpoints.....	11-26
Implementing Applications	11-27
LAB 11: IMPLEMENTING SERVICE BROKERS	11-39
Lab 11 Overview	11-40
Configure the Broker Service.....	11-41
Create a Request Application	11-55
Create an Application to Receive the Request	11-58
Create an Application to Receive the Response	11-65
INDEX.....	INDEX-1
