Microsoft SQL Server 2008 Integration Services
Table of Contents

INTRODUCTION INTRO-1

- Prerequisites INTRO-2
- Installing the Practice Files INTRO-3
  - Software Requirements INTRO-3
  - Security INTRO-4
  - A Word about the Sample Files INTRO-5
  - Script Language INTRO-6
  - Sample Databases INTRO-6
  - A Note about Excel INTRO-8
  - Installation INTRO-9
- About the Author INTRO-10

A GUIDED TOUR OF INTEGRATION SERVICES 1-1

- Understanding Integration Services 1-2
  - What Is ETL? 1-2
  - Integration Services Packages 1-3
  - Tools for Building Integration Services Packages 1-4
  - Integration Services Package Storage Options 1-5
  - Creating a Package with the Import and Export Wizard 1-5
  - Other Ways to Launch the Import and Export Wizard 1-16
- Exploring and Executing an Integration Services Package in BIDS 1-17
  - The BIDS Interface and Components 1-18
  - Executing a Package in BIDS 1-39
- Exploring and Executing a Package Outside of BIDS 1-44

LAB 1: A GUIDED TOUR OF INTEGRATION SERVICES 1-51

- Lab 1 Overview 1-52
- Use the Import and Export Wizard 1-53
- Use BIDS to Create a Package Manually 1-59
- Execute a Package with BIDS and DTExecUI.exe 1-69

CONTROL FLOW 2-1

- Overview of Control Flow in Integration Services 2-2
  - Elements in a Control Flow 2-2
  - Control Flow Tasks 2-5
- Working with Workflow Tasks 2-9

The Execute SQL Task 2-9
File System Task 2-25
FTP Task 2-30
Send Mail Task 2-35
Precedence Constraints 2-40
Why Use Precedence Constraints? 2-41
Implementing Precedence Constraints 2-42
Recommendations 2-50

LAB 2: CONTROL FLOW 2-55
Lab 2 Overview 2-56
Work with the Execute SQL Control Flow Task 2-57
Implement Precedence Constraints 2-67

DATA FLOWS 3-1
The Data Flow Task 3-2
Data Flow Pipeline 3-3
Data Flow Sources 3-4
Data Flow Destinations 3-14
Data Viewers 3-16
Data Flow Transformations 3-33
Row Transformations 3-33
Rowset Transformations 3-34
Split and Join Transformations 3-34
Business Intelligence Transformations 3-35
Other Transformations 3-35

LAB 3: DATA FLOWS 3-61
Lab 3 Overview 3-62
Create a Data Flow Source 3-63
Create a Data Flow Destination and Data Viewer 3-71
Create a Package Using Several Transformations 3-77

VARIABLES AND CONFIGURATIONS 4-1
Understanding Variables 4-2
Variable Properties 4-3
Variable Data Types 4-4
Variable Scope 4-5
Where Can You Use Variables? 4-6
Scope and the Execute Package Task 4-13

Copyright © by Application Developers Training Company
All rights reserved. Reproduction is strictly prohibited.

Using Variables in Control Flows 4-14
Execute SQL Task 4-14
File System Task 4-14
Precedence Constraint Expressions 4-15
Property Expressions 4-16
Send Mail Task 4-17
Foreach Loop Container 4-18
Script Task 4-19
Using Variables in Data Flow 4-29
Connection Managers 4-29
Derived Column Transformation 4-29
Conditional Split Transformation 4-30
Parameters 4-30
Configurations 4-31
Using Configurations 4-31
Configuration Storage 4-32
Using Variables and Configurations between Packages 4-39
Parent and Child Scenarios 4-39
Direct Configuration 4-40
Indirect Configuration 4-40

LAB 4: VARIABLES AND CONFIGURATIONS 4-49
Lab 4 Overview 4-50
Using Variables with Parameterized Queries 4-51
Working with Property Expressions 4-57
Working with XML Configuration Files 4-61

ADVANCED CONTROL FLOW 5-1
Advanced Control Flow Overview 5-2
Using Containers 5-3
Container Properties 5-4
Task Host Container 5-4
Sequence Container 5-5
Foreach Loop Container 5-6
For Loop Container 5-22
Grouping Container 5-28
Transaction Support in Integration Services 5-34

LAB 5: ADVANCED CONTROL FLOW 5-55
Lab 5 Overview 5-56

Import Data from CSV Files with a Foreach Loop Container 5-57

ERROR HANDLING AND LOGGING 6-1

When Things Go Wrong 6-2

Checkpoints 6-3

Handling Errors and Debugging 6-14

Error Handling in Control Flows with Precedence Constraints 6-14

Error Outputs in Data Flows 6-22

Breakpoints 6-33

Package Logging 6-39

Configuring Package Logging 6-46

Logging to a Text File 6-47

Logging to the Windows Event Log 6-54

Custom Logging 6-58

Event Handling 6-59

LAB 6: ERROR HANDLING AND LOGGING 6-75

Lab 6 Overview 6-76

Create a Package that Fails 6-77

Redirect Problem Rows Using Error Outputs 6-83

ADVANCED DATA FLOW 7-1

Synchronous and Asynchronous Transformations 7-2

Synchronous Transformations 7-2

Asynchronous Transformations 7-3

Using Advanced Transformations 7-5

Audit Transformation 7-5

Multicast Transformation 7-5

Derived Column Transformation 7-6

Union All Transformation 7-6

Merge Transformation 7-6

Lookup Transformation 7-7

Fuzzy Lookup Transformation 7-8

Conditional Split Transformation 7-8

Handling Slowly Changing Dimensions 7-18

Loading a Data Warehouse 7-18

The Slowly Changing Dimension Transformation 7-18

LAB 7: ADVANCED DATA FLOW 7-39

Lab 7 Overview 7-40

Work with the Lookup Transformation 7-41
Work with Derived Column and Conditional Split Transformations 7-54

PACKAGE DEPLOYMENT 8-1
Deploying Packages 8-2
Deployment Challenges 8-3
Create a Package Deployment Utility 8-7
Deployment Utility Properties 8-7
Deployment Folder 8-8
Deployment Manifest 8-9
Installing a Package 8-15
The Package Installation Wizard 8-15
Deploy a Package to the File System 8-16
Deploy a Package to SQL Server 8-24
Importing a Package Using Management Studio 8-28
Should You Deploy to SQL Server or the File System? 8-32
Redeploying Updated Packages 8-34

LAB 8: PACKAGE DEPLOYMENT 8-39
Lab 8 Overview 8-40
Create a Package Deployment Utility 8-41
Deploy a Package to the File System 8-43
Deploy a Package to SQL Server 8-49

PACKAGE MANAGEMENT 9-1
Overview of Package Management 9-2
Managing Integration Services Packages 9-3
Managing Packages with DTUtil 9-3
Managing Packages with Management Studio 9-6
Executing Packages 9-14
DTExecUI: The Execute Package Utility 9-14
Executing Packages at the Command Line with DTExec 9-23
Scheduling Package Execution with SQL Server Agent 9-27
Integration Services Security 9-36
Protecting Sensitive Package Information 9-37
Controlling Access to Packages Stored in SQL Server 9-46
Signing Packages with Digital Certificates 9-57

LAB 9: PACKAGE MANAGEMENT 9-63
Lab 9 Overview 9-64

Copyright © by Application Developers Training Company
All rights reserved. Reproduction is strictly prohibited.

Store a Package in SQL Server 9-65
Use DTUtil to Move a Package 9-69
Schedule a Package with SQL Agent 9-72

SCRIPTING AND CUSTOM COMPONENTS 10-1
Extending Integration Services Capabilities through Code 10-2
Integration Services Scripting 10-2
Custom Component Development 10-3
Integration Services Scripting 10-3
Integration Services Object Model 10-6
Visual Studio Tools for Applications Script Editor 10-7
Scripting in Control Flows with the Script Task 10-14
Variables 10-15
Going Beyond Built-In Tasks 10-24
Scripting in Data Flows with the Script Component 10-26
Input and Output Columns 10-27
Script Component Types 10-28
Synchronous and Asynchronous Script Transformations 10-41
Going Beyond Built-In Data Flow Components 10-44
Custom Integration Services Components 10-45
Custom Component Development 10-45
Third-Party Integration Services Components 10-49

LAB 10: SCRIPTING AND CUSTOM COMPONENTS 10-55
Lab 10 Overview 10-56
Create a Custom Asynchronous Transformation 10-57
Create a Custom Performance Logging Task 10-69

BEST PRACTICES 11-1
Best Practices for Using Integration Services 11-2
Keep It Simple! 11-2
Best Practices for Package Development and Design 11-3
Development Standards 11-3
Package Design Best Practices 11-11
Error Handling and Logging 11-21
Data Flow Best Practices 11-24
Data Flow Source Performance 11-24
Data Flow Transformation Performance, Maintenance, and Ease of Use 11-26
Data Flow Destinations 11-36

Copyright © by Application Developers Training Company
All rights reserved. Reproduction is strictly prohibited.

Integration Services Engine Best Practices 11-38
Deployment and Management Best Practices 11-40
Deployment Best Practices 11-40
Security Best Practices 11-41
Management Best Practices 11-42

LAB 11: BEST PRACTICES 11-51
Lab 11 Overview 11-52
Compare OLE DB Destination Settings 11-53
Use SQL Server Profiler for Performance Tuning 11-59
Create and Use a Template 11-64

GOING BEYOND ETL 12-1
Using Integration Services Beyond ETL 12-2
Migrating and Maintaining SQL Servers with Integration Services 12-3
SQL Server Transfer Tasks 12-3
SQL Server Maintenance Plans 12-9
Working with Analysis Services 12-23
The Analysis Services Processing Task 12-23
Dimension and Partition Processing Destinations 12-23
Analysis Services Execute DDL Task 12-23
Data Mining Query Task 12-24
Slowly Changing Dimension Transformation 12-24
Working with Windows Management Instrumentation 12-25
The WMI Data Reader Task 12-25
The WMI Event Watcher Task 12-26

LAB 12: GOING BEYOND ETL 12-41
Lab 12 Overview 12-42
Transfer SQL Server Objects 12-43
Rebuild an Index with the Rebuild Index Task 12-52

INDEX INDEX-1
