

# Microsoft SharePoint 2007 for Developers Using C#

## Table of Contents

|   |      |
|---|------|
| INTRODUCTION.....   | I-1  |
| Prerequisites.....  | I-2  |
| Installing the Practice Files .....                         | I-3  |
| Software Requirements .....                                 | I-3  |
| Configuring the Environment .....                           | I-4  |
| Installation.....   | I-5  |
| Conventions in XML Samples.....                             | I-7  |
| About the Author.....                                       | I-8  |
| INTRODUCTION TO SHAREPOINT DEVELOPMENT .....                | 1-1  |
| Defining SharePoint.....                                    | 1-2  |
| Three Primary Versions of SharePoint .....                  | 1-2  |
| Products Based on WSS .....                                 | 1-2  |
| High-Level Features.....                                    | 1-3  |
| Types of SharePoint Sites .....                             | 1-3  |
| Common Aspects of Sites.....                                | 1-4  |
| Elements of a SharePoint Site .....                         | 1-4  |
| What Is SharePoint?.....                                    | 1-5  |
| SharePoint Development.....                                 | 1-6  |
| Configuration, Customization, and Solution Development..... | 1-7  |
| Site Collections and Sites .....                            | 1-8  |
| Site Collection Basics .....                                | 1-9  |
| Partitioning with Site Collections.....                     | 1-11 |
| Lists and Libraries.....                                    | 1-18 |
| List Views.....   | 1-18 |
| List Forms .....  | 1-18 |
| Base List Types .....                                       | 1-19 |
| WSS List Types .....  | 1-19 |
| Additional MOSS List Definitions .....                      | 1-20 |
| Web Part Pages.....   | 1-31 |
| Fundamentals .....  | 1-31 |
| Structure of a Web Part Page .....                          | 1-32 |
| Commonly Used Web Parts.....                                | 1-32 |
| Site Templates.....   | 1-38 |
| LAB 1: INTRODUCTION TO SHAREPOINT DEVELOPMENT.....          | 1-43 |

## *Table of Contents*

---

|   |      |
|---|------|
| Lab 1 Overview.....                                   | 1-44 |
| Create and Configure a New Site Collection .....      | 1-45 |
| Edit the Home Page.....                               | 1-51 |
| Save and Reuse the Site Template .....                | 1-55 |
| Things to Consider.....                               | 1-55 |
| SITE COLUMNS AND CONTENT TYPES.....                   | 2-1  |
| Site Columns .....                                    | 2-2  |
| Column Types.....                                     | 2-2  |
| Built-In Site Columns .....                           | 2-3  |
| Defining Site Columns .....                           | 2-3  |
| Content Types .....                                   | 2-8  |
| Built-In Content Types .....                          | 2-8  |
| Defining Content Types .....                          | 2-9  |
| Lists and Content Types .....                         | 2-11 |
| Terminology Fun: Column and Field.....                | 2-12 |
| Tying It All Together.....                            | 2-13 |
| Design Implications.....                              | 2-14 |
| Custom Columns in Lists .....                         | 2-14 |
| Site Columns and Content Types .....                  | 2-14 |
| Editing Columns and Types .....                       | 2-15 |
| LAB 2: SITE COLUMNS AND CONTENT TYPES .....           | 2-27 |
| Lab 2 Overview.....                                   | 2-28 |
| Create a New Site Column and Content Type.....        | 2-29 |
| Create a New Custom List Using the Content Type ..... | 2-33 |
| Save the List as a Template .....                     | 2-37 |
| Things to Consider.....                               | 2-37 |
| EXTENDING LISTS WITH OFFICE 2007 .....                | 3-1  |
| Microsoft Office SharePoint Designer 2007.....        | 3-2  |
| Workflows and Lists .....                             | 3-3  |
| Components of an SPD Workflow .....                   | 3-4  |
| Workflow Forms .....                                  | 3-4  |
| Complex Logic in Workflows.....                       | 3-14 |
| Workflow Conditions .....                             | 3-14 |
| Workflow Actions .....                                | 3-15 |
| Limitations.....                                      | 3-15 |
| Access 2007 and SharePoint .....                      | 3-28 |
| Word 2007 Mail Merge .....                            | 3-30 |

|  |      |
|--|------|
| LAB 3: EXTENDING LISTS WITH OFFICE 2007 .....                              | 3-37 |
| Lab 3 Overview.....  | 3-38 |
| Create an SPD Workflow to Schedule Consultations .....                     | 3-39 |
| Things to Consider.....  | 3-39 |
| Extend the Workflow to Create an Item Using Task Data .....                | 3-43 |
| Things to Consider.....  | 3-43 |
| Use Access and Microsoft Word to Create a New Customer Welcome Letter..... | 3-47 |
| <br>AUTHENTICATION AND AUTHORIZATION .....                                 | 4-1  |
| Security Concepts.....   | 4-2  |
| Authentication .....   | 4-2  |
| Evidence Handling .....  | 4-2  |
| Authentication Mechanisms .....  | 4-3  |
| Windows Authentication.....  | 4-3  |
| Forms-Based Authentication.....  | 4-4  |
| Impersonation, Delegation, and Elevation .....                             | 4-4  |
| Choosing an Authentication Mode .....                                      | 4-5  |
| Dealing with Multiple Audiences .....                                      | 4-6  |
| Zones .....  | 4-6  |
| Limitations of FBA.....  | 4-7  |
| Internet Tutorial Warning .....  | 4-7  |
| Authorization in SharePoint .....  | 4-8  |
| Security Terminology .....   | 4-8  |
| Default WSS Groups.....  | 4-11 |
| Default WSS Permission Levels .....  | 4-11 |
| Permission Level Granularity – Lists.....                                  | 4-12 |
| Permission Level Granularity – Sites .....                                 | 4-12 |
| Permission Level Granularity – Personalization Permissions ...             | 4-13 |
| Securable Objects and Inheritance.....                                     | 4-16 |
| Web Application Security .....   | 4-17 |
| <br>LAB 4: AUTHENTICATION AND AUTHORIZATION .....                          | 4-21 |
| Lab 4 Overview.....  | 4-22 |
| Create a Web Application Using Kerberos .....                              | 4-23 |
| Things to Consider.....  | 4-23 |
| Add Windows Users to SharePoint Groups.....                                | 4-25 |
| Create and Use a Permission Level .....                                    | 4-28 |
| <br>FORMS BASED AUTHENTICATION AND ANONYMOUS ACCESS .....                  | 5-1  |

---

*Table of Contents*

|  |      |
|--|------|
| Membership and Role Providers .....                            | 5-2  |
| Anonymous Access .....   | 5-8  |
| Limitations of Anonymous Access .....                          | 5-10 |
| Custom Membership and Anonymous Access .....                   | 5-11 |
| LAB 5: FORMS BASED AUTHENTICATION AND ANONYMOUS ACCESS .       | 5-21 |
| Lab 5 Overview.....  | 5-22 |
| Create and Add Users to a Membership Database .....            | 5-23 |
| Configure a Site's Zones for Forms-Based Authentication.....   | 5-26 |
| Things to Consider.....  | 5-26 |
| Manage FBA User Permissions in SharePoint .....                | 5-29 |
| SHAREPOINT ARCHITECTURE .....                                  | 6-1  |
| Building Blocks .....  | 6-2  |
| Internet Information Server .....                              | 6-2  |
| Simple Page Processing .....                                   | 6-2  |
| ISAPI Filters .....  | 6-3  |
| ISAPI Extensions .....   | 6-3  |
| Web Service Extensions and Application Mappings.....           | 6-4  |
| Application Pools .....  | 6-5  |
| ASP.NET.....   | 6-5  |
| Page Request Pipeline .....                                    | 6-6  |
| How SharePoint Extends ASP.NET.....                            | 6-6  |
| SQL Server .....   | 6-7  |
| Page Storage and Processing .....                              | 6-14 |
| The 12 Hive.....   | 6-14 |
| Provisioning .....   | 6-15 |
| SPVirtualPathProvider in Action .....                          | 6-15 |
| SPPageParserFilter .....                                       | 6-16 |
| Ghosted and Unghosted Pages.....                               | 6-17 |
| Application Pages .....  | 6-24 |
| LAB 6: SHAREPOINT ARCHITECTURE .....                           | 6-29 |
| Lab 6 Overview.....  | 6-30 |
| Modify the Team Site Template's Default Page .....             | 6-31 |
| Things to Consider.....  | 6-31 |
| Customize the Default Page and Configure PageParserPaths ..... | 6-34 |
| Configure SafeControls to Allow XmlDataSource.....             | 6-36 |
| FEATURES .....   | 7-1  |

|   |          |
|---|----------|
| Features.....   | 7-2      |
| Capabilities of Features .....                        | 7-2      |
| Features in the 12 Hive.....                          | 7-2      |
| Feature Schema .....                                  | 7-3      |
| Installing and Activating Features .....              | 7-4      |
| Types of Features .....                               | 7-11     |
| Custom Actions in Publishing .....                    | 7-13     |
| Feature Scopes.....                                   | 7-22     |
| Feature Activation .....                              | 7-23     |
| <br>LAB 7: FEATURES.....                              | <br>7-37 |
| Lab 7 Overview.....                                   | 7-38     |
| Use Visual Studio 2005\2008 to Define a Feature.....  | 7-39     |
| Extend the Feature to Include Elements.....           | 7-42     |
| Install and Activate the Feature .....                | 7-45     |
| Things to Consider.....                               | 7-45     |
| <br>SOLUTION DEVELOPMENT .....                        | <br>8-1  |
| Development Environment .....                         | 8-2      |
| Required Tools.....                                   | 8-2      |
| Recommended Tools .....                               | 8-2      |
| Developing on a Remote Server .....                   | 8-3      |
| Developing Locally.....                               | 8-4      |
| Versioning and Integration .....                      | 8-4      |
| Web Solution Packages.....                            | 8-5      |
| Solution Manifest .....                               | 8-5      |
| Solution Manifest Schema .....                        | 8-6      |
| Feature.xml ElementFile Element.....                  | 8-7      |
| The Life of a Feature.....                            | 8-7      |
| Solution Complexity .....                             | 8-8      |
| Solution Store and Farm Management .....              | 8-9      |
| Benefits of SharePoint Solution Deployment.....       | 8-9      |
| Common Failure Modes .....                            | 8-15     |
| Mitigating Complexity.....                            | 8-24     |
| <br>LAB 8: SOLUTION DEVELOPMENT .....                 | <br>8-33 |
| Lab 8 Overview.....                                   | 8-34     |
| Use Visual Studio 2005\2008 to Create a Solution..... | 8-35     |
| Things to Consider.....                               | 8-35     |
| Create a DDF File and Build a WSP Package.....        | 8-38     |
