

Database Programming with Microsoft SQL Server 2000

Table of Contents

INTRODUCTION	INTRO-1
The Practice Disks	INTRO-2
Chapter Files	INTRO-2
Attaching the SQL Server Shark Database	INTRO-2
About the Authors	INTRO-5
SQL SERVER TOUR	1-1
SQL Server Editions	1-2
Features Supported for Each Edition	1-3
Graphical Tools	1-6
Analysis Services	1-6
English Query	1-6
Books Online	1-6
Client Network Utility	1-7
Configure SQL XML Support in IIS	1-8
Enterprise Manager	1-8
Import and Export Data	1-9
Profiler	1-10
Query Analyzer	1-10
Server Network Utility	1-13
Service Manager	1-14
Exploring the Enterprise Manager	1-15
The Wizards	1-17
Databases	1-18
Data Transformation Services (DTS)	1-20
Management	1-22
Replication	1-27
Security	1-27
Support Services	1-29
Meta Data Services	1-30
Working with SQL Server Books Online	1-31
The Active Subset	1-32
The Index Tab	1-32
The Search Tab	1-33
The Favorites Tab	1-34
LAB 1: SQL SERVER TOUR	1-39

Lab 1 Overview	1-40
Investigate Server Properties and Run a Wizard	1-41
Use the Query Analyzer	1-47
INSTALLING SQL SERVER	2-1
Multiple Instances	2-2
Multiple Instance Scenarios	2-2
Using Named Instances	2-3
Installing an Instance of SQL Server	2-5
Before Installing SQL Server	2-5
Setting up the System Accounts	2-10
Installing SQL Server 2000	2-11
Configuring the Server	2-26
General Properties	2-28
Memory	2-28
Processor	2-30
Security	2-31
Connections	2-32
Server Settings	2-32
Database Settings	2-34
Replication	2-36
Active Directory	2-37
DESIGNING AND CREATING A DATABASE	3-1
Relational Database Design Principles	3-2
The Origins of Relational Design	3-3
Data Normalization	3-5
Understanding Relationships	3-8
Beyond Normalization	3-12
Implementing the Design	3-13
Database Storage	3-13
Creating Databases	3-15
Creating Tables	3-24
Creating Constraints	3-31
Triggers	3-39
Creating Indexes	3-40
Database Diagrams	3-43
LAB 3: DESIGNING AND CREATING A DATABASE	3-51
Lab 3 Overview	3-52
Create a SQL Server Database	3-53

Create SQL Server Tables	3-55
Create Relationships Using a Database Diagram	3-58
BASIC QUERYING.....	4-1
Introduction to the Query Analyzer	4-2
Retrieving Data	4-5
Understanding Transact-SQL	4-5
The Shark Sample Database	4-6
The SELECT Statement	4-7
The WHERE Clause	4-11
Sorting Data Using ORDER BY	4-20
The GROUP BY Clause.....	4-23
Joining Tables.....	4-30
Principles of Joining	4-30
Inner Joins	4-34
Outer Joins.....	4-38
Self Joins	4-45
LAB 4: BASIC QUERYING	4-51
Lab 4 Overview	4-52
Simple Select Query	4-53
Aggregate Query	4-56
Joining Tables with an Inner Join	4-58
Aggregate Query with Multiple Inner Joins	4-60
Aggregate Query with Inner and Outer Joins	4-62
ACTION QUERIES	5-1
Modifying Data.....	5-2
What Is an Action Query?	5-2
Inserting Data	5-3
Inserting a Single Value	5-4
Inserting Multiple Values.....	5-6
Inserting Multiple Rows.....	5-8
Creating a New Table Using SELECT INTO	5-9
Temporary Tables.....	5-9
Using BULK INSERT	5-12
Updating Data.....	5-14
Updating a Single Row	5-14
Updating Multiple Rows	5-15

Updating From Another Table.....	5-15
Deleting Data	5-16
Deleting a Single Row.....	5-16
Deleting Multiple Rows	5-16
LAB 5: ACTION QUERIES	5-21
Lab 5 Overview	5-22
Adding a Product	5-23
Editing a Product	5-26
Deleting a Product	5-29
USING THE QUERY ANALYZER	6-1
Query Analyzer Features.....	6-2
Customizing the Toolbar	6-2
The File Menu Items	6-4
Multiple Connections.....	6-4
Opening Scripts	6-5
Saving Scripts and Result Sets.....	6-6
The Edit Menu Items.....	6-8
Goto, Bookmarks	6-8
Templates	6-9
Advanced	6-12
Query Menu Items	6-13
Executing Queries.....	6-13
Displaying Query Plans and Index Tuning.....	6-13
Configuring Result Sets	6-16
The Show Options	6-17
Connection Options	6-19
Tools Menu Items	6-20
Object Browser	6-20
Using the Transact-SQL Debugger.....	6-28
Object Search	6-31
Manage Indexes	6-34
Manage Statistics.....	6-36
Options and Customize.....	6-38
Window Menu Items	6-40
Help Menu Items.....	6-41
LAB 6: USING THE QUERY ANALYZER	6-47
Lab 6 Overview	6-48

Using the Object Browser to Create a Table	6-49
Using the Object Browser to Create a Stored Procedure	6-52
Using the Transact-SQL Debugger	6-54
PROGRAMMING WITH TRANSACT-SQL.....	7-1
Overview of Transact-SQL	7-2
Transact-SQL Extensions	7-2
Batches	7-3
Variables	7-3
Delimiters and Operators	7-5
Transact-SQL and Data Types	7-6
Using Built-In Functions	7-9
Working with Nulls	7-9
Functions and Numbers	7-11
String Functions	7-13
Date and Time Functions	7-16
Using the @@ Functions	7-19
Control of Flow.....	7-22
IF...ELSE.....	7-22
BEGIN...END.....	7-22
GOTO, RETURN, and Labels.....	7-23
CASE	7-24
WHILE.....	7-26
Error Handling.....	7-27
Using @@Error.....	7-27
Using RAISERROR for Ad Hoc Error Messages	7-28
LAB 7: PROGRAMMING WITH TRANSACT-SQL.....	7-35
Lab 7 Overview.....	7-36
Converting Data Types	7-37
Using Built-In Functions	7-39
Using Control of Flow Constructs	7-41
Handling Errors.....	7-43
TRANSACTION PROCESSING.....	8-1
Transactions	8-2
What Is a Transaction?	8-2
Applications and Transactions	8-3
Transaction Types	8-3
How Autocommit Works.....	8-4

Creating Explicit Transactions	8-4
Working with Locks	8-6
What Is a Lock Used For?	8-6
Monitoring Processes and Locks	8-9
Finding Current SQL Server Users	8-9
Finding Currently Issued Locks.....	8-11
Transaction Isolation.....	8-15
READ COMMITTED	8-15
READ UNCOMMITTED	8-15
REPEATABLE READ	8-17
SERIALIZABLE	8-19
Lock Hints	8-21
Blocking and Deadlocks	8-24
What Is a Deadlock?	8-24
Setting Deadlock Priority.....	8-24
Avoiding Blocking and Deadlocks.....	8-25
LAB 8: TRANSACTION PROCESSING	8-29
Lab 8 Overview	8-30
Explicit Transactions.....	8-31
Current Locking Activity	8-34
CREATING VIEWS	9-1
What Is a View?	9-2
Advantages of Views	9-2
Views and Security	9-2
Creating Views.....	9-3
View Syntax	9-3
Tools for Creating Views.....	9-4
View Examples	9-9
Using Derived Tables Instead of Views	9-12
Updating Views.....	9-14
LAB 9: CREATING VIEWS.....	9-21
Lab 9 Overview	9-22
Creating a Summary View	9-23
Using Views to Update Data.....	9-26
BACKUPS AND MAINTENANCE.....	10-1
Creating a Backup Strategy.....	10-2

Asking the Right Questions.....	10-2
Understanding the SQL Server 2000 Recovery Models	10-3
Analyzing Your Needs	10-6
Test the Plan	10-7
Backing Up User Databases	10-7
Backing Up the System Databases	10-7
Implementing Backups	10-9
How Database Backups Work	10-9
Backing Up a Database	10-11
Restoring from a Backup	10-16
What Happens During a Restore?	10-16
The Database Maintenance Plan Wizard	10-20
LAB 10: BACKUPS AND MAINTENANCE	10-35
Lab 10 Overview	10-36
Backup and Restore a Database	10-37
Create a Database Maintenance Plan	10-39
STORED PROCEDURES AND TRIGGERS	11-1
Building Stored Procedures	11-2
Stored Procedure Features.....	11-2
Why Stored Procedures Are Faster	11-3
Uses for Stored Procedures.....	11-4
Creating Stored Procedures	11-4
Creating Useful Stored Procedures	11-5
SET NOCOUNT ON	11-14
Temporary Tables and Stored Procedures	11-15
Error Handling in Stored Procedures	11-18
Using RETURN Values and RAISERROR	11-23
The Transact-SQL Debugger.....	11-26
Building Triggers.....	11-31
What Is a Trigger?	11-31
Using INSTEAD OF Triggers.....	11-38
Views and INSTEAD OF Triggers.....	11-38
LAB 11: STORED PROCEDURES AND TRIGGERS	11-43
Lab 11 Overview	11-44
Creating a Stored Procedure	11-45
Using the Transact-SQL Debugger	11-48

USER-DEFINED FUNCTIONS.....	12-1
User-Defined Functions in SQL Server 2000	12-2
Scalar Functions	12-3
Scalar Function Syntax	12-3
Scalar Function Examples	12-4
Inline Table-Valued Functions	12-8
Inline Syntax	12-8
Inline Function Example.....	12-9
Executing Inline Table-Valued Functions.....	12-9
Inline Functions with Parameters	12-10
Updating Data with Inline Functions	12-11
Multi-Statement Table-Valued Functions.....	12-13
Multi-Statement Function Syntax	12-13
Multi-Statement Function Examples	12-14
Executing Multi-Statement Functions	12-17
Functions, Views, and Stored Procedures.....	12-18
Using Functions with Views and Stored Procedures	12-18
Choosing Between Functions, Views, and Stored Procedures.....	12-21
LAB 12: USER-DEFINED FUNCTIONS.....	12-27
Lab 12 Overview	12-28
Create a Scalar Function	12-29
Create an Inline Table-Valued Function	12-31
Create a Multi-Statement Table-Valued Function.....	12-33
ADVANCED QUERIES AND LINKED SERVERS.....	13-1
Dynamic SQL.....	13-2
Stored Procedure with Dynamic WHERE Clause	13-2
EXECUTE, EXECUTE(), and sp_executeSQL	13-5
Dynamic SQL and Permissions	13-7
Transact-SQL Cursors	13-8
When to Use Cursors.....	13-8
How to Use Cursors	13-8
A Cursor Example.....	13-9
Handling Large Data Sets.....	13-12
Horizontally Partitioning Tables	13-12
Distributed Partitioned Views	13-15
Vertically Partitioning Tables.....	13-16
Distributed Queries	13-19

The Distributed Architecture	13-19
Setting Up Linked Servers	13-20
Querying Linked Servers	13-24
Ad Hoc Querying.....	13-26
LAB 13: ADVANCED QUERIES AND LINKED SERVERS	13-33
Lab 13 Overview	13-34
Setting Up a Linked Server.....	13-35
Remote Querying.....	13-37
SECURITY	14-1
Security Overview	14-2
Windows NT 4.0 and Windows 2000	14-2
The Two Stages of Security	14-2
Authentication	14-4
Configuring SQL Server Security Settings.....	14-5
Windows NT/Windows 2000 Authentication	14-6
SQL Server Authentication	14-11
Understanding Roles	14-14
Fixed Server Roles	14-14
Fixed Database Roles.....	14-17
User-Defined Roles.....	14-20
Understanding Ownership	14-21
Assigning Permissions.....	14-23
Database User Accounts	14-23
Permission Types	14-25
Permission Statements	14-26
Granting Permissions.....	14-27
Securing Data	14-29
Application Roles	14-35
Uses for Application Roles.....	14-35
How Application Roles Work.....	14-35
Creating an Application Role	14-36
LAB 14: SECURITY.....	14-43
Lab 14 Overview	14-44
Create a SQL Server Login	14-45
Grant Permissions to Database Objects and Statements	14-48
Create and Test an Application Role	14-50

MONITORING, TUNING, AND CONFIGURATION.....	15-1
Evaluating Performance	15-2
Define Monitoring Goals	15-2
SQL Server Monitoring Tools.....	15-2
Monitoring with SQL Server Profiler	15-5
Profiler Terminology	15-5
Getting Started with the Profiler	15-6
Tuning Queries	15-12
How Join Types Affect Performance.....	15-12
Performance Issues with Joins and Subqueries	15-13
Avoid Cursors	15-16
Working with Indexes.....	15-18
What Is an Index?	15-18
Clustered and Non-Clustered Index Recommendations.....	15-18
Using Graphical Showplan.....	15-21
Indexed Views	15-25
When to Use Indexed Views.....	15-25
Indexed View Requirements	15-26
Using the Index Tuning Wizard.....	15-30
Capturing a Workload	15-30
Analyzing the Workload	15-31
Providing an Indexing Recommendation	15-31
Data Caching.....	15-38
The Data Cache.....	15-38
The Procedure Cache.....	15-39
The System Monitor.....	15-40
Objects and Counters	15-40
Getting Started with System Monitor	15-41
When to Use the System Monitor	15-44
LAB 15: MONITORING, TUNING, AND CONFIGURATION.....	15-51
Lab 15 Overview.....	15-52
Optimizing Queries	15-53
USING SYSTEM OBJECTS.....	16-1
Exploring System Objects.....	16-2
Using System Functions	16-3
Using Information Schema Views	16-8
Using System Stored Procedures.....	16-10
How to Find What You're Looking For	16-13

Extended Stored Procedures	16-15
DBCC.....	16-20
Using DBCC CHECKDB	16-21
Locating DBCC Commands.....	16-22
LAB 16: USING SYSTEM OBJECTS	16-27
Lab 16 Overview	16-28
Does a Table Exist?.....	16-29
Using Extended Stored Procedures	16-31
AUTOMATING ADMINISTRATION WITH SQL AGENT	17-1
Configuring SQL Server Agent	17-2
Setting SQL Server Agent Properties	17-4
Operators.....	17-9
Jobs	17-11
Alerts.....	17-19
LAB 17: AUTOMATING ADMINISTRATION WITH SQL AGENT	17-29
Lab 17 Overview	17-30
Create an Operator.....	17-31
Create a Job	17-33
Create an Alert.....	17-35
DATA TRANSFORMATION SERVICES (DTS)	18-1
Introduction	18-2
What Is DTS?.....	18-2
When to Use DTS	18-2
The DTS Import/Export Wizard.....	18-3
Using the DTS Import/Export Wizard	18-4
Saving and Scheduling a DTS Package	18-5
DTS Packages.....	18-10
The DTS Designer	18-10
DTS Package Components	18-11
Connection Objects.....	18-12
The Transform Data Task	18-16
Other Built-In Tasks	18-21
Controlling DTS Workflow.....	18-23
Precedent Constraints	18-23
DTS Transactions	18-23

Error Handling	18-25
Custom ActiveX Scripts	18-26
LAB 18: DATA TRANSFORMATION SERVICES (DTS).....	18-41
Lab 18 Overview	18-42
Setting Up a Transformation Task	18-43
Adding an ActiveX Scripting Task.....	18-46
REPLICATION.....	19-1
Introduction to Replication	19-2
What Is Replication?	19-2
How Replication Works	19-3
Replication Terminology	19-4
Replication Topologies.....	19-5
Replication Pre-Requisites.....	19-6
Replication Components.....	19-7
Replication Methods	19-8
Snapshot Replication	19-9
Transactional Replication.....	19-11
Merge Replication	19-14
Why Bi-Directional Replication Is Bad	19-15
Transformable Subscriptions	19-17
Determining the Best Replication Scenario	19-18
Implementing Replication	19-20
Configuring Your SQL Server for Replication	19-20
Create a Publication.....	19-25
Pushing a Subscription	19-30
LAB 19: REPLICATION.....	19-37
Lab 19 Overview	19-38
Configuring Replication.....	19-39
Creating Publications and Subscriptions	19-41
PUBLISH SQL SERVER DATA TO THE WEB	20-1
Publishing Data to the Web	20-2
Overview	20-2
The Web Assistant Wizard	20-3
Publishing Data.....	20-4
Viewing the Output.....	20-16
Editing a Web Job Using Its Stored Procedure.....	20-17
Web Jobs and Triggers.....	20-17

The SQL Server Web Stored Procedures	20-19
sp_makewebtask	20-20
sp_runwebtask	20-21
sp_dropwebtask	20-21
Scheduling Web Jobs	20-22
LAB 20: PUBLISH SQL SERVER DATA TO THE WEB	20-29
Lab 20 Overview	20-30
Create a Web Job	20-31
Edit a Web Job	20-38
XML FEATURES: PART I	21-1
XML Fundamentals	21-2
Why Do You Need XML?	21-2
A Context Example	21-3
How XML Compares to HTML	21-3
XML Document Structure	21-5
Validating XML Data with Schemas	21-8
Using XSLT to Transform XML Data	21-12
Generating XML from SQL Queries with FOR XML	21-15
Using AUTO Mode	21-15
Using RAW Mode	21-18
Generating an XML Schema	21-19
Using FOR XML EXPLICIT	21-21
What's Different about EXPLICIT Mode?	21-21
Constructing the UNION Query	21-21
Special Column Aliases	21-22
Is There More?	21-25
Setting Up IIS for SQL Server	21-27
What Is an IIS Virtual Directory?	21-27
Creating a Virtual Directory	21-27
Configuring the Virtual Directory	21-29
Accessing SQL Server Using a URL	21-33
URL Queries	21-33
Template Queries	21-35
LAB 21: XML FEATURES: PART I	21-45
XML Lab Overview	21-46
Set Up an IIS Virtual Directory	21-47
Test IIS Access	21-48

Use FOR XML EXPLICIT and OpenXML	21-50
XML FEATURES: PART II	22-1
Creating XML Views with Annotated Schemas	22-2
A Practical Example	22-2
Annotating a Schema.....	22-3
Using Template XPath Queries with Annotated Schemas.....	22-4
Using URL XPath Queries with Annotated Schemas	22-5
Using XPath to Retrieve SQL Server Data Directly	22-8
Using OpenXML to Work with XML Documents in Transact-SQL	22-10
Getting Started with OpenXML	22-10
Inserting Data from XML into SQL Server with OpenXML	22-15
Using Updategrams	22-18
What Is an Updategram?	22-18
FULL TEXT SEARCH.....	23-1
What Is Full-Text Search?	23-2
The Microsoft Search Service.....	23-2
Configuring Full-Text Search	23-4
The Full-Text Indexing Wizard	23-4
Writing Full-Text Queries	23-10
The CONTAINS Predicate	23-10
The FREETEXT Predicate.....	23-14
Combining Full-Text and Transact-SQL Predicates	23-15
Using the CONTAINSTABLE Rowset Function	23-15
Using the FREETEXTTABLE Rowset Function.....	23-18
Using Full-Text Search with Documents Stored in SQL Server	23-20
Preparing a Table to Store Documents.....	23-20
Loading Documents	23-22
Adding Full-Text Indexing	23-23
Searching for Text in the Documents.....	23-24
LAB 23: FULL TEXT SEARCH.....	23-31
Lab 23 Overview	23-32
Configure Full-Text Indexing.....	23-33
Write Queries Using Full-Text Syntax.....	23-35
ANALYSIS SERVICES.....	24-1
Understanding Analysis Services	24-2
Cubes, Dimensions, and Measures	24-2

MOLAP, ROLAP, and HOLAP	24-4
Partitions and Virtual Cubes	24-5
Building a Simple Cube	24-7
Using the Cube Wizard	24-8
Using the Dimension Wizard.....	24-9
Creating Time Dimensions.....	24-10
Using the Cube Editor.....	24-11
Configuring Data Storage Options	24-14
Browsing Data from a Cube.....	24-17
The Cube Browser	24-17
Exploring MDX.....	24-23
MDX Syntax	24-23
Testing MDX Queries.....	24-24
Data Mining.....	24-26
Creating a Data-Mining Model	24-27
Browsing a Data-Mining Model	24-29
LAB 24: ANALYSIS SERVICES	24-35
Lab 24 Overview	24-36
Build the Location Cube.....	24-37
Use Cube Browser to Answer Questions about the Data	24-40
ENGLISH QUERY	25-1
Overview of English Query	25-2
Before You Start—Preparing Your Database	25-3
Creating an English Query Application	25-5
The English Query Model Editor	25-6
Deploying an English Query Application.....	25-19
Compile the Application	25-19
Deploying an English Query Application to the Web	25-20
Using the Deploy to Web Wizard	25-21
LAB 25: ENGLISH QUERY	25-31
Lab 25 Overview	25-32
Create an English Query Application	25-33
Test an English Query Application.....	25-37
INDEX.....	INDEX-1
