Microsoft SQL Server 2005: Additional Topics
Table of Contents

INTRODUCTION INTRO-1
- Prerequisites INTRO-2
- Installing the Practice Files INTRO-3
  - Software Requirements INTRO-3
  - Hardware Requirements INTRO-3
  - Sample Databases INTRO-3
  - Installation INTRO-4
- About the Authors INTRO-5

DISASTER RECOVERY 1-1
- Planning a Backup Strategy 1-2
  - Your Business Needs and Capabilities 1-2
  - Considering Data Recovery Needs 1-3
  - Availability Demands 1-3
  - Data Usage 1-4
  - Size of Database(s) 1-4
  - Database Server Configuration 1-4
  - Disaster Recovery Testing 1-5
  - Recovery Time Considerations 1-5
- Backing Up Databases 1-6
  - Backup Devices 1-6
  - Creating Backups 1-11
  - Recovery Models 1-13
  - Types of Backup 1-17
- Scheduling Your Backups 1-29
  - Scheduling System Database Backups 1-29
  - Scheduling Simple Backups 1-29
  - Scheduling Full and Bulk-Logged Backups 1-30
  - Backing Up Related Databases 1-31
- Verifying Backup Media 1-33
  - Using Checksums 1-33
  - Using RESTORE VERIFYONLY 1-35
- Restoring Databases 1-36
  - Roll Forward Set 1-36
  - Restoring with the Simple Recovery Model 1-37
  - Restoring with Full/Bulk-Logged Recovery Models 1-38

Online Restore 1-47
Using Database Snapshots 1-49
Creating a Database Snapshot 1-49
Reverting to a Database Snapshot 1-51
Deleting a Database Snapshot 1-51
Summary 1-52

LAB 1: DISASTER RECOVERY 1-55
Lab 1 Overview 1-56
Back Up and Restore a Simple Recovery Model 1-57
Back Up and Restore a Full Recovery Model 1-66
Create and Revert to a Database Snapshot 1-76

FAILOVER CLUSTERING 2-1
High Availability Overview 2-2
Levels of Availability and Downtime 2-2
Estimating Availability Requirements 2-3
SQL Server 2005 Failover Cluster 2-4
Preparing a Server Cluster 2-6
Hardware and Software Requirements 2-8
Special Considerations 2-10
Creating a New Cluster 2-11
Set Up Domain Service Accounts 2-11
Prepare Static IP Addresses 2-12
Configure Computer Servers 2-12
Prepare Shared Disks 2-14
Create the New Cluster Server 2-16
Configure the Cluster 2-21
Add the Distributed Transaction Coordinator 2-22
Installing SQL Server 2005 Failover 2-25
What to Expect 2-25
Before Installing SQL Server Cluster 2-26
Running SQL Server Setup 2-26
System Configuration Checks 2-27
After Installing SQL Server 2-35
Adding SQL Server Nodes 2-38
Add a New Node to the Cluster 2-38
Add a Node to the SQL Server Virtual Server Cluster 2-41
Remove a SQL Server Virtual Server Node 2-47

DATABASE MIRRORING 3-1
Understanding Mirroring 3-2
How Mirroring Works 3-2
The Mirroring Session 3-4
Database Mirroring Operating Modes 3-5
Role Switching (Failover) 3-7
Other Mirroring Details 3-8
Database Mirroring Endpoints 3-9
Client-Side Redirection 3-10
Setting Up Database Mirroring 3-11
Prerequisites 3-11
Configuration Recommendations 3-12
Configuring the Recovery Model 3-12
Configuring Mirroring with SQL Server Management Studio and Transact-SQL 3-13
Configuring the Endpoints 3-14
Configuring the Operating Mode 3-21
Setting Up the Mirror Server Database 3-23
Backing Up the Principal 3-23
Restoring Full Backup on the Mirror 3-24
Restoring Transaction Log Backups on the Mirror 3-25
Starting the Mirroring Session 3-26
Working with a Mirror Session 3-27
Accessing Mirror Data with Snapshots 3-32
Monitoring Database Mirroring 3-33
Viewing the Mirror, Witness, and Endpoints 3-33

LAB 3: DATABASE MIRRORING 3-39
Lab 3 Overview 3-40
Configure Security for Database Mirroring 3-41
Configure Database Mirroring 3-51
Monitor Database Mirroring 3-60

LOG SHIPPING 4-1
Overview 4-2
Log Shipping Requirements 4-3
Security Requirements 4-4
Configuring Log Shipping 4-5
Transaction Log Shipping Property Page 4-5
Configuring the Primary Database 4-6

Copyright © by Application Developers Training Company
All rights reserved. Reproduction is strictly prohibited.

Configuring the Secondary Database 4-9
Configuring the Monitor Server 4-14
Saving the Log Shipping Configuration 4-17
Removing Log Shipping 4-18
Monitoring Log Shipping Jobs 4-20
Viewing the Agent Job History 4-20
Transaction Log Shipping Status Report 4-21
Querying Log Shipping System Tables 4-22
Querying with Log Shipping Stored Procedures 4-23
Configuring Log Shipping in Transact-SQL 4-24
Configuring the Primary Database 4-24
Configuring the Primary Backup Job 4-25
Configuring the Secondary Database 4-27
Configuring the Secondary Copy Job 4-28
Configuring the Secondary Restore Job 4-29
Removing Log Shipping 4-31

LAB 4: LOG SHIPPING 4-35
Lab 4 Overview 4-36
Configure Security for Log Shipping 4-37
Configure Log Shipping 4-45
Monitor Log Shipping 4-52

PEER-TO-PEER REPLICATION 5-1
High-Availability 5-2
Requirements and Limitations 5-4
Protecting Data with Partitioning 5-4
Special Identity Columns Handling 5-5
Configuring Peer-to-Peer Replication 5-6
Security Planning 5-7
Configuring the Distributor 5-11
Configure Distribution Wizard 5-11
Adding a Publisher Server 5-17
Changing a Distributor's Properties 5-18
Securing the Distributor 5-19
Creating the Publisher 5-20
Specify the Distributor 5-20
Publication Database 5-21
Publication Type 5-22
Articles 5-22

Copyright © by Application Developers Training Company

Filter Table Rows and Snapshot Agent 5-23
Agent Security 5-23
Wizard Actions 5-25
Complete the Wizard 5-26
Creating Publication 5-27
Allowing Peer-to-Peer Subscriptions 5-27
Securing the Publisher 5-28
The Replication Monitor 5-29
Configuring Peer-to-Peer Subscribers 5-34
Initializing the Subscriber Database 5-34
Peer Distributor Preparation 5-36
Securing the Distributor 5-38
Configuring Peer-to-Peer Topology 5-40
Publication Specification 5-41
Peers 5-41
Log Reader Agent Security 5-42
Distribution Agent Security 5-45
New Peer Initialization 5-46
Completing the Wizard 5-48
Securing the Publisher 5-49
Configuring the PAL 5-49
Identity Columns 5-50
Adding a Node to an Existing Topology 5-50
Well-Connected Topology 5-51

LAB 5: PEER-TO-PEER REPLICATION 5-57
Lab 5 Overview 5-58
Configure the Distributor 5-59
Create the Publisher 5-64
Configure the Peer-to-Peer Topology 5-72

MONITORING AND TROUBLESHOOTING 6-1
Diagnosing and Resolving Database Server Errors 6-2
Using the Dedicated Administrator Connection (DAC) 6-2
SQL Server Error Logs 6-13
Error Messages in Event Logs 6-15
Setting Up Alerts in SQL Server Agent 6-17
Advantages of Using Alerts 6-17
Configuring the Alert 6-17
Monitoring SQL Server Agent Job History 6-22

Copyright © by Application Developers Training Company
All rights reserved. Reproduction is strictly prohibited.

Job Activity Monitor 6-23
Gathering Performance and Optimization Data Using DMVs 6-25
DMV Permission Requirements 6-26
Inspecting a Server with DMVs 6-33
Troubleshooting Bottlenecks 6-33
Collecting Information Using DMVs 6-37
SQL Server 2005 Performance Dashboard Reports 6-38
DMVStats 6-42

LAB 6: MONITORING AND TROUBLESHOOTING 6-49
Lab 6 Overview 6-50
Use the DAC to Access an Unresponsive Server 6-51
Experiment with DMVs 6-59
Create an Alert 6-62

IMPLEMENTING SERVICE BROKERS 7-1
Understanding Service Brokers 7-2
Service Broker Advantages 7-2
Service Broker Applications 7-3
Service Broker Messaging 7-4
Service Broker Uses 7-5
Designing Service Broker Applications 7-6
Message Types 7-6
Service Broker Activation 7-7
Transaction Life Cycle 7-9
Handling Errors 7-11
Handling Poison Messages 7-12
Service Broker Security 7-12
Programming Service Broker Applications 7-18
Enabling Service Broker 7-18
Creating Message Types 7-19
Creating Contracts 7-20
Creating the Queue 7-21
Creating the Service 7-22
Creating Routes 7-23
Creating Service Broker Endpoints 7-26
Implementing Applications 7-27

LAB 7: IMPLEMENTING SERVICE BROKERS 7-39
Lab 7 Overview 7-40

Copyright © by Application Developers Training Company
All rights reserved. Reproduction is strictly prohibited.

Configure the Broker Service 7-41
Create a Request Application 7-55
Create an Application to Receive the Request 7-58
Create an Application to Receive the Response 7-65

IMPLEMENTING SQL SERVER PARTITIONS 8-1
Overview of Table-Based Partitioning 8-2
Why Partition? 8-2
What's New in SQL Server 2005? 8-3
Range Partitions 8-6
Partition Key and Number of Partitions 8-6
Using Multiple Filegroups 8-7
Index Partitioning 8-9
Creating Partitioned Tables 8-11
Creating a Partition Function 8-11
Creating a Partition Scheme 8-16
Partitioning Tables and Indexes 8-22
Querying Partitions 8-26
Using the $PARTITION Function 8-26
Catalog Views 8-30
Managing Partitions 8-35
Modifying Partitioned Tables or Indexes 8-35
Modifying a Partition Function 8-35
Modifying a Partition Scheme 8-39
Backing Up Partitions 8-40
Performance Considerations 8-41

LAB 8: IMPLEMENTING SQL SERVER PARTITIONS 8-47
Lab 8 Overview 8-48
Creating a Partitioned Table 8-49
Querying a Partitioned Table 8-52
Modifying a Partitioned Table 8-54

COMPLEX QUERYING 9-1
Working with NULL Values 9-2
SqlTypes and CLR Types 9-2
About the ANSI_NULLS Option 9-5
NULLs and SqlBoolean 9-8
Assigning NULL Values 9-10

Copyright © by Application Developers Training Company
All rights reserved. Reproduction is strictly prohibited.

Ranking Grouped Data 9-13
The ROW_NUMBER Function 9-13
Using the RANK Function 9-15
Introducing the DENSE_RANK Function 9-17
The NTILE Function 9-18
Writing Correlated Subqueries 9-21
Subquery Basics 9-21
What is a Correlated Subquery? 9-22
Using the WHERE Clause 9-23
Including the HAVING Clause 9-25
Correlated Subqueries and Updates 9-27
Comparing to Joins and Temp Tables 9-27
Using Common Table Expressions 9-30
When to Use CTEs 9-30
CTE Syntax 9-30
Recursive CTEs 9-32

LAB 9: COMPLEX QUERYING 9-42
Lab 9 Overview 9-43
Rank Grouped Data 9-44
Write a Correlated Subquery 9-47
Develop a Recursive CTE 9-51

ADVANCED TECHNIQUES 10-1
Complex Data and Structures 10-2
Issues with Data Types 10-2
Working with Multinational Data 10-5
Working with Hierarchical Data 10-9
Writing More Efficient Queries 10-15
The EXISTS Clause 10-15
Joins vs. Subqueries 10-17
One-Pass Queries 10-18
Using Temporary Tables 10-21
Table Variables 10-23
User-Defined Table-Valued Functions 10-24
Common Table Expressions 10-30
Worktables 10-31
Working with Complex Queries 10-37
Using Implicit Transactions 10-37
Keeping it Simple 10-40

Copyright © by Application Developers Training Company
All rights reserved. Reproduction is strictly prohibited.

Maintaining Query Files 10-46
Using Source Control and Versioning 10-46
Using Visual SourceSafe 10-47

LAB 10: ADVANCED TECHNIQUES 10-63
Lab 10 Overview 10-64
Use CTEs to Generate Hierarchical Data 10-65
Use Worktables 10-69
Simplify the Complex 10-75

WORKING WITH XML 11-1
The xml Data Type 11-2
Declaring XML Objects 11-2
Loading Data into an XML Instance 11-4
Indexing XML Columns 11-10
XML Schema Collections 11-13
Typed and Untyped XML 11-13
Schema Basics 11-14
Registering Schemas 11-17
Viewing Stored Schemas 11-20
Querying XML 11-28
XQuery 11-28
FOR XML 11-32
OPENXML 11-36
Best Practices 11-40
Relational vs. XML Data Model 11-40
Storing XML in SQL Server 2005 11-41
Reasons to Index XML Columns 11-41
Querying 11-42

LAB 11: WORKING WITH XML 11-47
Lab 11 Overview 11-48
Validate XML Using Schemas 11-49
Query XML 11-55
Return Data in XML Format 11-60

INDEX INDEX-1
