

VBA Foundations for Microsoft Office

Table of Contents

INTRODUCTION	INTRO-1
Courseware Conventions	INTRO-2
The Practice Disks	INTRO-3
Working with the Office Samples	INTRO-3
About the Author	INTRO-5
GETTING STARTED WITH VBA	1-1
What Is VBA?	1-2
Why Would You Want to Use VBA?	1-2
What Products Host VBA?	1-4
The Flavors of Office	1-4
Who Has Licensed VBA?	1-5
What Does a VBA Application Look Like?	1-6
Custom Dialog Boxes	1-6
Custom Toolbars and Menus	1-7
Custom Buttons	1-7
Behind-the-Scenes Operations	1-8
The Code Underneath It All	1-9
Working with VBA in a Host Product	1-10
Where Does VBA Code Live?	1-10
Where are Projects Stored in Office Products?	1-11
Where Are Projects Stored in Other VBA Hosts?	1-12
How Do You Make VBA Code Happen?	1-13
The Immediate Window	1-13
User Interface Tools	1-14
Events	1-17
Starting with VBA by Recording Macros	1-19
Recorded Macros in Excel, Word, and PowerPoint	1-19
Using the Macro Recorder	1-19
Running a Recorded Macro	1-21
Looking at the Code You Wrote	1-22
Modifying the Code to Make It Do More (or Less)	1-23
Why Not Just Record Macros?	1-25
A Word About Access Macros	1-25
LAB 1: GETTING STARTED WITH VBA	1-31

Lab 1 Overview	1-32
Setting Security Levels	1-33
Explore an Excel VBA Application	1-35
Call a Function from the Excel User Interface.....	1-39
Try Out a Word VBA Application	1-41
Record a Macro in Word.....	1-46
Create a Toolbar and Button in Word	1-51
Call a Function from an Access Query	1-55
WRITING VBA PROCEDURES	2-1
Overview of the Visual Basic Editor.....	2-2
Opening the Visual Basic Editor.....	2-2
The Project Explorer	2-3
The Properties Window.....	2-4
The Immediate Window	2-4
The Code Window	2-4
Working with the Project Explorer.....	2-5
What Kinds of Components Does a Project Contain?	2-5
Adding Items to a Project.....	2-7
Removing Items from a Project.....	2-7
Saving a Project.....	2-7
Working with Multiple Projects	2-7
Naming Your Project.....	2-8
Creating Simple Procedures.....	2-10
Understanding Functions	2-10
Writing Your First VBA Function	2-12
Key Concepts	2-15
Running Your Function from Word.....	2-17
Creating a Simple Sub Procedure.....	2-18
Running a Sub Procedure.....	2-19
Understanding the Code Window	2-20
Anatomy of a Module.....	2-20
Changing a Module's Name.....	2-21
Customizing the Visual Basic Editor	2-22
Showing and Hiding Windows.....	2-22
Docking and Undocking Windows.....	2-22
Changing the Editor Format.....	2-23
Displaying Toolbars	2-24
LAB 2: WRITING VBA PROCEDURES.....	2-29

Lab 2 Overview	2-30
Create and Rename a VBA Project	2-31
Add a New Module to a Project	2-33
Create a Simple Function	2-36
Call a VBA Procedure from an Excel Worksheet	2-39
Change the Visual Basic Editor Format	2-40
WORKING WITH VARIABLES AND CONSTANTS	3-1
What Is a Variable?	3-2
Give Your Variables Meaningful Names	3-3
Data Types	3-4
What Is a Data Type?	3-4
Choosing a Data Type	3-5
Declaring Variables	3-6
Using a Naming Convention	3-8
Initializing Variables	3-9
Why Not Just Use the Variant Data Type?	3-10
When Can I Use the Variant Data Type?	3-10
Implicit vs. Explicit Declarations	3-12
Working with Arrays	3-15
What Is An Array?	3-15
Declaring Arrays	3-16
Working with Elements of Arrays	3-17
Changing an Array's Size	3-18
Detecting Array Bounds	3-19
An Array Example	3-20
Using Constants	3-21
The Carriage Return-Line Feed Constant	3-21
Using the MsgBox Function	3-22
Creating Your Own Constants	3-25
LAB 3: WORKING WITH VARIABLES AND CONSTANTS	3-29
Lab 3 Overview	3-30
Use Data Types and Variables	3-31
Use Option Explicit	3-33
Set Option Explicit as the Default	3-36
Apply a Naming Convention	3-39
Use Built-In Constants	3-42

Define and Use a Constant	3-44
VISUAL BASIC EDITOR TECHNIQUES.....	4-1
Writing Code Efficiently	4-2
Moving Code Around	4-2
Printing Code.....	4-3
Viewing Multiple Procedures.....	4-3
Formatting Code	4-4
Commenting Out Code	4-5
Setting a Bookmark	4-5
Taking Advantage of IntelliSense	4-7
List Properties/Methods (CTRL+J).....	4-7
List Constants (CTRL+SHIFT+J)	4-8
Parameter Info (CTRL+SHIFT+I).....	4-8
Word Completion	4-9
Optional and Named Arguments	4-11
Optional Arguments	4-11
Introducing Named Arguments	4-11
LAB 4: VISUAL BASIC EDITOR TECHNIQUES	4-17
Lab 4 Overview	4-18
Move Code to a New Procedure.....	4-19
Comment Out Code with the Edit Toolbar	4-21
Use IntelliSense to Get Help	4-23
Use Named Arguments	4-25
MASTERING VBA CONTROL STRUCTURES	5-1
Branching Structures.....	5-2
Why Branch?	5-2
If...Then...[Else...]End If	5-2
If...Then...Else[If]...End If	5-4
Select Case	5-5
GoTo	5-9
Looping Structures	5-11
What is a Loop?.....	5-11
Do...Loops	5-11
Do...Loop with Conditions	5-13
For...Next.....	5-16
LAB 5: MASTERING VBA CONTROL STRUCTURES	5-23
Lab 5 Overview	5-24

Use If...Then/Else...End If	5-25
Use Select Case	5-27
Use a Do...Loop.....	5-29
Use a For...Next Loop.....	5-31
INVESTIGATING BUILT-IN FUNCTIONS.....	6-1
VBA's Built-In Functions	6-2
Using the Object Browser to Find VBA Functions.....	6-3
Testing Functions in the Immediate Window	6-6
Convert Your Name to Proper Case	6-6
Calculate Your Age in Weeks	6-10
Interacting with the Computer.....	6-14
Working with the Windows Registry	6-14
VBA Registry Functions.....	6-15
Calling the Functions	6-16
VBA Functions You'll Probably Need.....	6-19
Strings	6-19
Dates and Times.....	6-19
Conversion	6-20
Other Useful Functions	6-21
LAB 6: INVESTIGATING BUILT-IN FUNCTIONS	6-25
Lab 6 Overview	6-26
Request Data Using the InputBox Function.....	6-27
Work with Strings	6-30
Work with Dates.....	6-32
Work with the Format Function.....	6-34
CREATING USER FORMS.....	7-1
Working with User Forms	7-2
What Are User Forms?	7-2
Creating a New User Form	7-2
Design Mode vs. Run Mode.....	7-3
Adding Controls to a User Form	7-5
What Are Controls?	7-5
Introducing a Few Controls	7-5
Formatting Controls.....	7-8
Selecting a Control	7-8
Moving a Control.....	7-8

Resizing a Control	7-8
Working with Multiple Controls.....	7-9
Deleting Controls	7-10
Formatting Controls	7-10
Setting Properties at Design Time	7-11
Working with the Properties Window.....	7-12
A Few Common Properties.....	7-13
Introducing Events.....	7-17
Event Procedures	7-17
Creating an Event Procedure.....	7-18
The Click Event.....	7-19
The Change Event.....	7-20
Setting Properties at Run Time.....	7-22
Setting Property Values	7-22
Retrieving Property Values	7-23
Setting Control Properties.....	7-23
Additional ActiveX Controls	7-26
Where Do I Get These Other Controls?	7-26
Adding a Control to the Toolbox.....	7-26
Organizing the Toolbox.....	7-28
Modifying an ActiveX Control's Properties	7-28
Using the Calendar Control.....	7-30
Working with Methods	7-33
The Show Method.....	7-33
The SetFocus Method.....	7-34
Working with List Boxes and Combo Boxes	7-36
Using the AddItem Method or Combo Box	7-36
Using a List Box's or Combo Box's List Property	7-37
What Did the User Choose?	7-38
LAB 7: CREATING USER FORMS	7-43
Lab 7 Overview	7-44
Create Text Boxes and Labels	7-45
Use the Click Event.....	7-50
Change Control Properties from Code.....	7-53
Open a Form from a Toolbar Button.....	7-54
Use the SetFocus Method	7-60
UNDERSTANDING OBJECT MODELS.....	8-1

Defining the Terms.....	8-2
What Is an Object?	8-2
Object Models.....	8-2
The Excel Object Model.....	8-3
The Microsoft Forms Object Model	8-4
Typical Objects in Other Products.....	8-4
Using the Object Browser	8-6
Opening the Object Browser	8-6
The Parts of the Object Browser	8-7
Working with Object Models in VBA	8-9
Referring to Objects in Collections	8-9
Referring to Collections Within Objects	8-11
Setting Properties on Objects	8-12
Object Variables.....	8-14
Introducing Object Variables	8-14
Using Object Variables	8-15
What About Uninitialized Object Variables?	8-16
Special VBA Control Structures for Objects.....	8-17
Using With...End With.....	8-17
Introducing For Each...Next	8-18
Differentiating Types of Controls	8-19
Working with the Office Object Models	8-22
The CommandBars Object Model	8-22
 LAB 8: UNDERSTANDING OBJECT MODELS	 8-31
Lab 8 Overview	8-32
Use Object Variables.....	8-33
Use With...End With.....	8-37
Use the Object Browser.....	8-39
 HANDLING ERRORS	 9-1
Recognizing a Run-Time Error	9-2
Different Kinds of Errors.....	9-2
Doesn't VBA Handle Run-Time Errors?	9-2
The Error-Handling Standard	9-4
The Three-Step Program	9-4
Creating a Standard Error Handler.....	9-4
Setting the Error Trap	9-6
Which Error Occurred?	9-6

Using the Error Number	9-7
Exiting the Error Handler	9-9
Resume	9-9
Resume Next.....	9-11
Resume <i>Label</i>	9-11
Inline Error Handling.....	9-12
On Error Resume Next	9-12
Disregarding Errors.....	9-12
Handling Errors as They Occur.....	9-12
Combining Types of Error Handling.....	9-14
LAB 9: HANDLING ERRORS	9-19
Lab 9 Overview	9-20
Use Simple Error Handling	9-22
Use the Err Object.....	9-26
Handle the Error.....	9-28
DEBUGGING YOUR VBA CODE	10-1
Debugging Your Code.....	10-2
What Is Break Mode?	10-2
What You Can Do In Break Mode	10-4
The Debug Toolbar	10-5
Setting a Breakpoint.....	10-6
Hard-Coding Breakpoints.....	10-6
Using Debug.Assert in Office 2000/XP	10-7
Stepping Through Code	10-10
Single Step Mode	10-10
Procedure Step Mode	10-10
Stepping Out of a Procedure.....	10-11
Running to the Cursor.....	10-12
Continuing Execution.....	10-12
Resetting the Project	10-12
Checking Values at Run Time	10-13
Using Auto Data Tips.....	10-13
Using the Immediate Window	10-14
Using the Locals Window.....	10-15
Watch Expressions.....	10-17
Using Watch Expressions	10-17
Conditional Watch Expressions	10-20

The Call Stack.....	10-22
Using the VBA Call Stack Dialog Box	10-22
Working with Error Handling.....	10-23
The Debugging Process.....	10-29
Write Bug-Free Code.....	10-29
Debugging Hints	10-29
LAB 10: DEBUGGING YOUR VBA CODE.....	10-35
Lab 10 Overview	10-36
Experiment with Break Mode.....	10-37
Watch Expressions.....	10-39
UNDERSTANDING EVENTS	11-1
Events and Event Procedures	11-2
What Did You Just Do?.....	11-3
Where To from Here?	11-3
Which Objects Have Events?	11-4
User Form Events	11-5
The UserForm QueryClose Event.....	11-5
Event Procedure Arguments	11-6
Control Events.....	11-8
Before/AfterUpdate Events	11-8
Click Event.....	11-9
Product-Specific Events	11-11
Word's Open Event.....	11-11
The Worksheet Change Event.....	11-13
Outlook's ItemSend Event	11-14
Is There More?.....	11-15
Getting At Other Events.....	11-16
LAB 11: UNDERSTANDING EVENTS.....	11-23
Lab 11 Overview	11-24
Change a Form's Caption on Load.....	11-25
Capitalize Data Entry in a Text Box.....	11-27
Spell-Check a Document on Close.....	11-28
Work with a Cancelable Event.....	11-30
PUTTING IT ALL TOGETHER.....	12-1
Assembling the Pieces	12-2

Building a Solution in Excel	12-3
Creating the User Form	12-3
Using the Product-Specific Event.....	12-4
Running the Solution	12-5
Using the Solution in Word	12-7
Copying the User Form.....	12-7
Changing the User Form.....	12-7
Using the Product-Specific Event.....	12-8
Creating a Template	12-8
Running the Solution	12-8
Where Are You Going from Here?.....	12-10
APPENDIX A: CALLING VBA PROCEDURES FROM THE USER INTERFACE.....	A-1
Calling a VBA Procedure from the User Interface.....	A-2
Adding Shortcut Keys	A-2
Adding Form Controls to a Document	A-6
Creating Custom Toolbars and Buttons	A-8
Using User Defined Functions in an Excel Worksheet Cell	A-11
Calling a Function in an Access Form or Query	A-11
APPENDIX B: COMPARISON OF VBA, VISUAL BASIC, AND MICROSOFT ACCESS FORMS	B-1
Confused Yet?	B-2
Loading and Unloading Forms.....	B-3
Events	B-4
Properties.....	B-5
APPENDIX C: THE REDDICK VBA NAMING CONVENTIONS, VERSION 6.0.....	C-1
Changes to the Conventions.....	C-2
An Introduction to Hungarian	C-3
Tags	C-4
Creating Data Types.....	C-6
Constructing Procedures	C-9
Prefixes	C-10
Suffixes.....	C-12
File Names	C-12
Host Application and Component Extensions to the Conventions.....	C-13
APPENDIX D: CREATING REUSABLE PROCEDURES	D-1

Design before Code	D-2
Why Bother?	D-2
Writing the Same Code Once	D-3
An Example: Parsing a String into Words	D-3
Move Duplicate Code to a New Procedure	D-6
Don't Hard-Code.....	D-9
Design with the Next Project in Mind.....	D-12
APPENDIX E: TECHNIQUES WITH LIST BOXES AND COMBO BOXES.....	E-1
Using Multi-Column List Boxes and Combo Boxes.....	E-2
Multiple Selection in List Boxes	E-6
Figuring Out What Was Selected	E-6
Moving Items Between List Boxes.....	E-8
Controlling Data Entry in Combo Boxes	E-9
APPENDIX F: RESOURCES	F-1
Where Can You Go for More Information?	F-2
Books	F-2
Journals.....	F-3
Web Sites	F-3
INDEX.....	INDEX-1

VBA Solutions for Microsoft Office

Table of Contents

INTRODUCTION	INTRO-1
Courseware Conventions	INTRO-2
The Practice Disks	INTRO-3
Working with the Office Samples	INTRO-3
About the Author	INTRO-5
EXPLORING THE OBJECT MODELS OF THE OFFICE PRODUCTS	13-1
Figuring Out Object Models	13-2
Working with the Object Browser: Access	13-3
The Access Challenge	13-3
Researching the Solution	13-3
Implementing the Solution	13-6
Knowing the Interactive Product: Word	13-8
The Word Challenge	13-8
Designing the Solution	13-8
Researching the Solution: The Interactive “Trick”	13-9
Researching the Solution: Word Fields	13-12
Researching the Solution: Finding the VBA Objects, Properties, and Methods	13-13
Implementing the Solution	13-19
Mining the Help File: Excel	13-22
The Excel Challenge	13-22
Designing the Solution	13-22
Researching the Solution: The Interactive “Trick”	13-23
Researching the Solution: Excel Ranges in VBA	13-24
Researching the Solution: The Worksheet Change Event	13-25
Researching the Solution: The Intersect Method	13-25
Implementing the Solution: The Utility Procedure	13-28
Implementing the Solution: Writing the Event Procedure	13-29
LAB 13: EXPLORING THE OBJECT MODELS OF THE OFFICE PRODUCTS	13-35
Lab 13 Overview	13-36
Find and Replace Text in Word	13-37
Highlight Blank Cells in an Excel Named Range	13-48
Save a Record in an Access Form	13-57

WORKING WITH ACTIVE OBJECTS	14-1
Active Properties in Office	14-2
Referring to Active Properties	14-2
Making an Object Active	14-3
Proceed with Caution.....	14-3
Excel's Active and Selection Properties.....	14-5
Using the ActiveWorkbook Property.....	14-5
Using the ActiveSheet Property	14-6
Working with Cells	14-7
Using the Selection Property with Charts.....	14-7
Word's Active and Selection Properties.....	14-9
Working with the ActiveDocument Property	14-9
Using the Selection Property and Selection Object.....	14-10
The Access Screen Object.....	14-11
LAB 14: WORKING WITH ACTIVE OBJECTS.....	14-17
Lab 14 Overview	14-18
Use Active Objects in Excel.....	14-19
Use the Selection Object in Word.....	14-21
Use the Screen Object in Access	14-23
USING ANOTHER PRODUCT'S FEATURES WITH AUTOMATION	15-1
Expanding Your Horizons Using Automation	15-2
Getting to the Object Model.....	15-3
Setting References	15-3
Viewing Other Applications' Objects	15-5
Creating an Instance of the Application.....	15-6
Creating an Automation Solution	15-7
Are All Applications the Same?.....	15-9
Working With an Existing Instance	15-11
Determining Whether an Application is Open.....	15-12
Closing Only If Necessary.....	15-12
Revising GetMedian	15-12
LAB 15: USING ANOTHER PRODUCT'S FEATURES WITH AUTOMATION.....	15-17
Lab 15 Overview	15-18
Set a Reference to Word	15-19
Open a New Document in Word from Excel	15-21

WORKING WITH DATA USING ADO	16-1
Introducing ActiveX Data Objects	16-2
What Is ADO?.....	16-2
Setting a Reference	16-2
The ADO Object Model.....	16-3
Working with Data in Recordsets.....	16-4
About Providers	16-4
Specifying Recordset Properties	16-9
Opening a Recordset.....	16-9
Referring to Fields in a Recordset.....	16-13
Checking for Empty Recordsets.....	16-14
Moving Through a Recordset	16-17
Types of Recordsets.....	16-19
Creating a Recordset Based on a SQL String	16-21
SQL Strings vs. Tables	16-21
Building SQL Strings At Run Time	16-21
Adding a Recordset to a Worksheet	16-24
How and When to Use DAO.....	16-26
The DAO Object Model.....	16-26
Using DAO in a Project.....	16-27
LAB 16: WORKING WITH DATA USING ADO	16-35
Lab 16 Overview	16-36
Set a Reference to ADO.....	16-37
Fill a Combo Box with ADO Data.....	16-39
Retrieve a Record Using a SQL Statement	16-41
Things to Consider.....	16-41
TECHNIQUES WITH VBA VARIABLES.....	17-1
Scope, Lifetime, and Precedence.....	17-2
Defining the Terms	17-2
Variable Scope	17-2
Variable Lifetime	17-5
Variable Precedence	17-6
Passing by Value and by Reference.....	17-8
What's the Difference?.....	17-8
When Is ByRef Undesirable?.....	17-10
When Is ByRef Helpful?.....	17-10
Which Should I Use?	17-12

Optional Arguments.....	17-14
Declaring Optional Arguments	17-14
Finding Out If a Value Was Sent.....	17-15
Defining Default Values	17-15
LAB 17: TECHNIQUES WITH VBA VARIABLES	17-21
Lab 17 Overview	17-22
Passing by Reference	17-23
Optional Parameters	17-29
ADDING DATA TO EXCEL, ACCESS, AND OUTLOOK.....	18-1
Using VBA to Work with Data.....	18-2
Adding Values to an Excel Worksheet.....	18-3
Working with Bound Controls in User Forms.....	18-3
Changing Data with a Bound Text Box	18-3
Working with Ranges in VBA	18-4
Saving Data at the End of a Range.....	18-10
Adding ADO Data to Excel	18-13
Designing the Solution	18-13
Finding the Data: A Special Note	18-14
Implementing the Solution	18-15
Adding a Database Record with ADO.....	18-20
Using the LockType Property.....	18-20
Updating Records	18-21
Adding Records	18-22
Adding a Customer to Excel and ADO	18-22
Working with the ADO Command Object.....	18-26
Properties of the Command Object.....	18-26
The Command.Execute Method	18-26
Executing an Action Query Using a Command Object	18-27
An Example: Updating Records Using a Command Object....	18-28
Adding an Item to Outlook	18-32
Sending an E-Mail Message with CreateItem	18-32
Navigating Folders.....	18-35
Adding Contact Information to Excel, Access, and Outlook....	18-40
LAB 18: ADDING DATA TO EXCEL, ACCESS, AND OUTLOOK	18-45
Lab 18 Overview	18-46
Use a Bound Text Box	18-47
Define a Named Range in Code.....	18-50

Find the Average of a Set of Values	18-52
Add Data to Excel Based on an ADO Recordset	18-56
Send an E-Mail Message	18-61
ADDING CONTENT TO WORD AND POWERPOINT	19-1
Adding Text to a Word Document.....	19-2
What Is a Range?	19-2
Referring to a Range	19-2
Inserting Text.....	19-3
Getting Cross Reference Information.....	19-7
Adding Content to PowerPoint.....	19-13
Automating Word	19-13
Creating Presentations and Slides	19-13
Using the Shape Object.....	19-14
Finding the Text Property.....	19-15
Creating a Presentation from Content in Word.....	19-16
LAB 19: ADDING CONTENT TO WORD AND POWERPOINT.....	19-25
Lab 19 Overview	19-26
Add a Cross-Reference in Word.....	19-27
Add a Shape to a PowerPoint Slide.....	19-32
CHARTING YOUR DATA	20-1
Excel's Chart Object.....	20-2
Charts vs. ChartObjects.....	20-2
Creating a Chart.....	20-3
Creating an Excel Chart from Access	20-6
Deciding Where to Put the Code.....	20-6
Transferring Data to Excel	20-6
Creating the Chart	20-7
Complete Procedure Listing.....	20-9
Pasting Excel Charts into Other Documents.....	20-13
The Template's Design	20-14
Filling the Combo Box.....	20-17
Getting the Data.....	20-19
Filling the Word Table	20-25
Creating the Chart	20-28
Adding the Chart to Word	20-28
LAB 20: CHARTING YOUR DATA.....	20-33

Lab 20 Overview	20-34
Record a Macro to Create a Chart.....	20-35
Change Chart Properties with VBA	20-39
GIVING YOUR SOLUTIONS TO OTHERS.....	21-1
Sharing the Wealth.....	21-2
Using Custom Toolbars.....	21-3
Access.....	21-3
Excel.....	21-5
Outlook and PowerPoint	21-6
Word.....	21-7
Office Templates and Add-Ins	21-8
Templates.....	21-8
Add-Ins	21-9
Securing Your Code	21-14
Using Microsoft Office Developer to Deploy Solutions.....	21-16
COM Add-Ins.....	21-16
The Packaging Wizard.....	21-16
APPENDIX A: THE REDDICK VBA NAMING CONVENTIONS, VERSION 6.0.....	A-1
Changes to the Conventions.....	A-2
An Introduction to Hungarian	A-3
Tags	A-4
Creating Data Types.....	A-6
Constructing Procedures	A-9
Prefixes	A-10
Suffixes.....	A-12
File Names	A-12
Host Application and Component Extensions to the Conventions.....	A-13
APPENDIX B: TECHNIQUES WITH LIST BOXES AND COMBO BOXES.....	B-1
Using Multi-Column List Boxes and Combo Boxes.....	B-2
Multiple Selection in List Boxes	B-6
Figuring Out What Was Selected.....	B-6
Moving Items Between List Boxes.....	B-8
Controlling Data Entry in Combo Boxes	B-9
APPENDIX C: DATA ACCESS OBJECTS.....	C-1
What Is DAO, Anyway?	C-2

- Two Object Hierarchies..... C-2
- Details of Syntax..... C-4
- DBEngine and Workspaces C-5
- Referring to Objects C-6
- Collections of Objects C-7
- Bang (!) versus Dot (.)..... C-8
- Using Default Collections..... C-8
- Enumerating Collections C-10
- Working with Recordsets..... C-12
 - Types of Recordsets..... C-12
 - Creating Recordsets C-13
 - Finding Records in Recordsets C-16
 - Updating Records in Recordsets C-21
 - Deleting Records in Recordsets..... C-22
 - Inserting Rows in Recordsets C-23
- Creating and Using QueryDefs..... C-25
 - QueryDefs C-25
 - Creating and Running a Select Query..... C-25
 - Creating a Recordset from a Parameter Query..... C-27
 - Executing Action Queries..... C-29
- SQL Review C-32
 - Using Variables in Your Criteria C-34
- APPENDIX D: RESOURCES..... D-1
 - Where Can You Go for More Information? D-2
 - Books D-2
 - Journals..... D-3
 - Web Sites D-3
- INDEX.....INDEX-1
